AWARE

Jennifer Tachell, M.Ed./Ed.S., Behavioral
Health Consultant, West Ada School District

Ben Skaggs, LCSW, Prog. Specialist Quality
Assurance Unit, ID Div. of Behavioral Health

A single focus
with two
prongs

Intercept suicide at the
gates of healthcare.

- Increase the number of healthcare professionals ready to intercept suicide.
- Increase the number of graduating students ready to intercept suicide.

Idaho State Plan Goal Alignment

Goal 7 – Expand knowledge of community and clinical service providers on nature, related behaviors, and prevention of suicide.

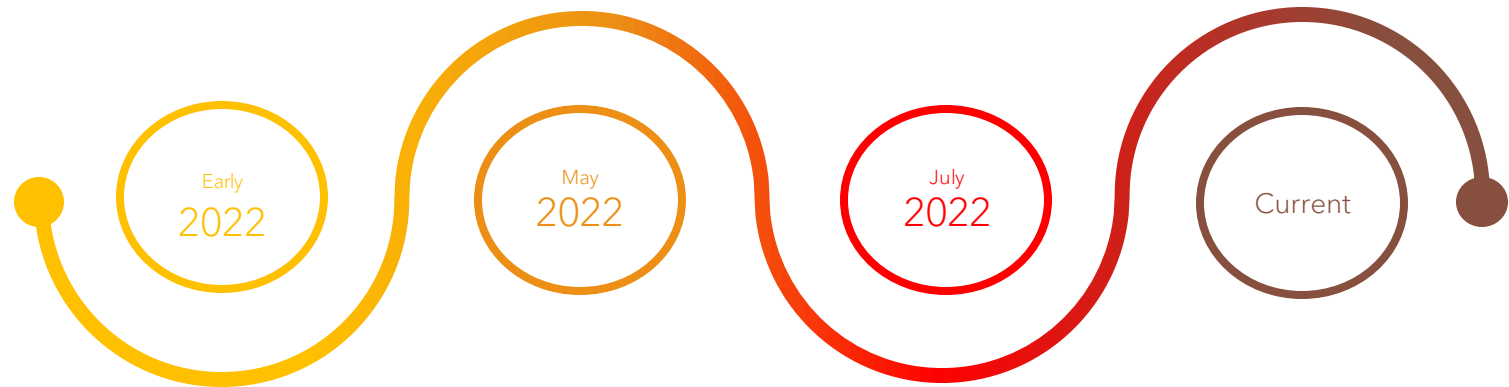

Goal 8 – Embed suicide prevention as a core component of health care services.

Goal 9 – Promote and implement effective clinical and professional practices for assessing and treating those identifying as being at risk for suicidal behaviors.

ROADMAP TO ALL PATIENTS SAFE TRAINING IN IDAHO

ROADMAP TO ALL PATIENTS SAFE TRAINING, CONTINUED

Expanding Efforts

Collaboration with Capacity Building and Infrastructure KPA to provide trainings to post-secondary students.

Analyze Data

Training data begins to be analyzed, and participants are encouraged to finish the course.

Follow-up Data

To understand retention, KPA is following up with participants, requesting they complete a 6-month post-training survey.

Maintain

Maintaining efforts and continuing to share the training opportunity out with individuals in Idaho.

Partnerships

Idaho Board of Nursing
Bureau of Rural Health & Primary Care

Three regions of Area Health Education Center, Idaho
Idaho State University
University of Idaho
ECHO Idaho

Three questions all participants answered correctly on the post-test that were most often missed on the pre-test:

Two-thirds of firearm-related suicides are suicides.

All participants retained knowledge of these facts after six months.

From suicide
her

But one-fifth of all suicides are Veterans.

Continued implementation may include

- Guest speaker and formal announcement launch event telecast to theaters in student union buildings, early 2023.
- Distribution of a reference guide from the Stahl's Handbook series through Cambridge Press.
- Development of process instructions for sustainability through member successions.
