ABOUT

The purpose of the Case Conceptualization for First Episode Psychosis (FEP) series is to introduce FEP therapists, skills trainers, and team leaders to three different case conceptualization approaches. The 9-session series will feature three different modalities for case conceptualization. Attendees will learn how case conceptualization can inform team-based, recovery-oriented care and the foundations of three different approaches: Cognitive Behavior Therapy for Psychosis (CBT-P), Culturally Informed Therapy for Schizophrenia, and Compassion-Focused Therapy for Psychosis. The series will include both didactic and experiential components.
