

# The Relationship Between Loneliness, Isolation, and Social Distancing

Scott Lewis, PHD, LPC

University of Pittsburgh Medical Center Western Psychiatric Hospital

**March 16, 2021**

Central East (HHS Region 3)

**MHTTC**

Mental Health Technology Transfer Center Network

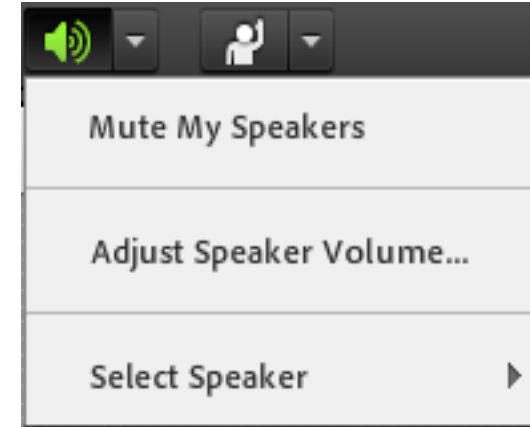

Funded by Substance Abuse and Mental Health Services Administration

# Audio Logistics

Today's audio is broadcast through your computer speakers, and your lines will be muted throughout the duration of the event.

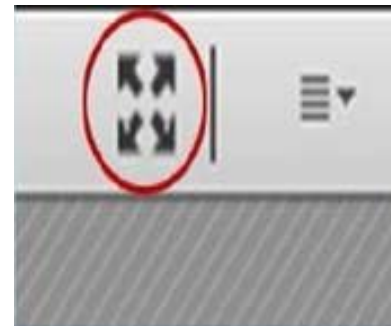

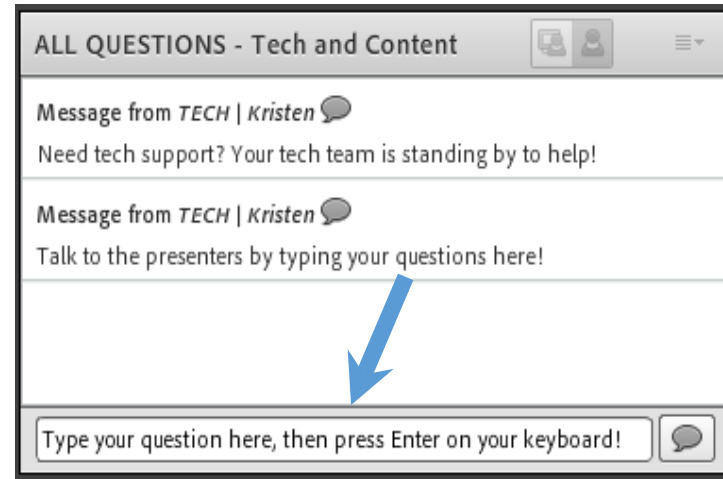

If you need help or would like the phone conference information, type in the ALL QUESTIONS box.

Use the Audio Setup Wizard or Speaker & Microphone Setup to change settings

# Questions and Resources

- Content questions and tech support requests go into the ALL QUESTIONS box.
- Share resources and network with colleagues in the Public Chat.
- Enlarge the screen with four outward facing arrows.

# MHTTC Network

MHTTC

Mental Health Technology Transfer Center Network

Funded by Substance Abuse and Mental Health Services Administration

MHTTC Network

# MHTTC Purpose

The MHTTC Network vision is to unify science, education and service to transform lives through evidence-based and promising treatment and recovery practices in a recovery-oriented system of care.

# Central East MHTTC Goals

## Funded by SAMHSA to:

- **Accelerate** the adoption and implementation of mental health related evidence-based practices
- **Heighten** the awareness, knowledge, and skills of the behavioral health workforce
- **Foster** alliances among culturally diverse practitioners, researchers, policy makers, family members, and consumers
- **Ensure** the availability and delivery of publicly available, free of charge, training and technical assistance

# Central East Region 3

# DISCLAIMER

This presentation was prepared for the Central East Mental Health Technology Transfer Center under a cooperative agreement from the Substance Abuse and Mental Health Services Administration (SAMHSA). All material appearing in this presentation, except that taken directly from copyrighted sources, is in the public domain and may be reproduced or copied without permission from SAMHSA or the authors. Citation of the source is appreciated. Do not reproduce or distribute this presentation for a fee without specific, written authorization from the Central East Mental Health Technology Transfer Center. This presentation will be recorded and posted on our website.

At the time of this presentation, Tom Coderre served as Acting Assistant Secretary for Mental Health and Substance Use at SAMHSA. The opinions expressed herein are the views of the speakers, and do not reflect the official position of the Department of Health and Human Services (DHHS), or SAMHSA. No official support or endorsement of DHHS, SAMHSA, for the opinions described in this presentation is intended or should be inferred.

# Evaluation Information

As part of receiving funding through SAMHSA to provide this training, the Central East MHTTC is required to submit data related to the quality of this event. At the end of today's presentation, please take a moment to complete a brief survey about today's training.

# **The Relationship Between Loneliness, Isolation, and Social Distancing**

**Scott Lewis, PHD, LPC**

# Objectives

1. Define the constructs of loneliness, isolation, and social distancing, their intra-relatedness, and the mechanisms by which they lead to poor physical and mental health.
2. Review how the COVID-19 pandemic has led to increased attention on social isolation and loneliness affecting individuals of all ages.
3. Review intervention strategies to help combat loneliness and social isolation.

# COVID-19 Phenomenon

# Definitions

- **Loneliness:** distressing emotional response to perceived lack of quantity and/or quality of relationships
- **Isolation:** separation from or in the absence of others
- **Social distancing:** maintaining physical distance between self and others as a measure to prevent spread of disease or infection

# Physical & Psychological Effects from Loneliness and Social Isolation

- Less resilient to stress
- Weakens immune functioning
- Cognitive decline
- Anxiety
- Depression
- Suicidality
- Decreases the likelihood that one will perform healthy behaviors such as exercising

# Intervention and Coping Strategies

## Where do we start?

---

Loneliness (subjective) and isolation (objective) are distinct constructs and therefore, must be addressed separately

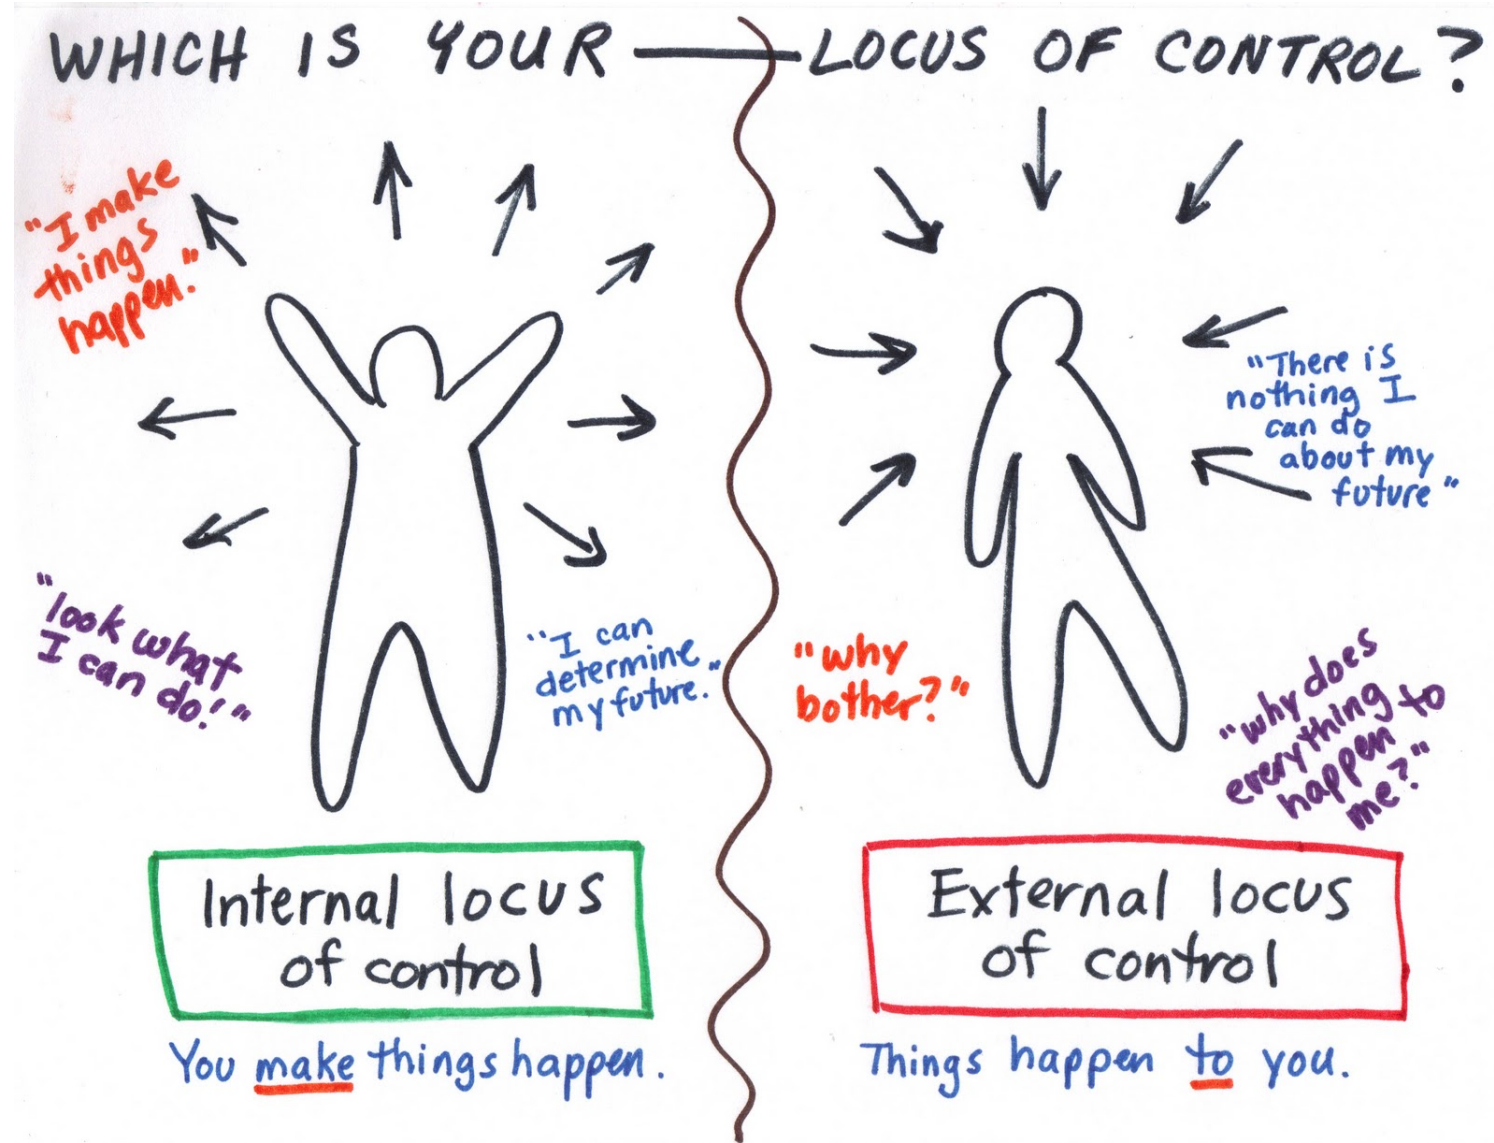

Targeting one doesn't necessarily influence the other

Increasing social interactions, time spent with others, etc. may not lead to feeling less lonely...

Need to address post-COVID era as well

# Locus of Control

# Coping Tactics

# Physiological Distress

**Deep breathing: 3-4-5 or 4-5-6**

**Progressive muscle relaxation**

**Vigorous movement or exercise**

**Mindfulness**

Reframe /  
Reassess

**Find the positive**

**Look for opportunities**

**Feel gratitude**

# Social Connection

**VIDEO CHATS**

**ONLINE COMMUNITIES**

**SAFELY  
DISTANCED/MASKED  
GET TOGETHERS**

**VOLUNTEER**

# Other interventions and coping

Self-care

Routine

Healthy diet

Exercise

Adequate sleep

Social prescribing by healthcare providers

Limit exposure to media/news

Quality time with family/friends

Spend time with pets

## Keeping each other safe and connected is everyone's responsibility

If you miss your friends and  
have something to share ...

... just reach out - they're  
still there.

### Physical distancing is not social isolation
