

The SMART Center 2022 Speaker Series

Get to know the Zoom Webinar interface

- Please Note:**
- All attendees are muted
 - Today's session will be recorded and posted on our event page: bit.ly/2022SMARTSpeakerSeries

The screenshot shows a Zoom webinar interface. At the top, there are navigation icons and buttons for "Click here to maximize your session view" and "Enter Full Screen". The main content area displays the TTC logo, the text "Thank you for joining us today!", and a list of speakers: Kimberly Arnold, Brian Boyd, Patricia (Tish) Jennings, Walter Gilliam, and Tunette Powell. A "Select a Speaker" menu is open, showing options like "Speakers (Realtek(R) Audio)", "Same as System", "Test Speaker & Microphone...", "Leave Computer Audio", and "Audio Settings...". A "Question and Answer" window is open, showing a test question and a text input field. A "Zoom Webinar Chat" window is also open, showing a message and a "To: All panelists" field. Callouts provide instructions: "You can switch between questions you've asked and those asked by others using these buttons." points to the "All questions (1)" and "My questions (1)" tabs; "You can use the Q&A feature to ask questions of the host and presenters. These questions can receive text or live responses. To begin asking a question use the field below. You can see a test question above." points to the "Type your question here..." input field; "The chat feature will allow you to talk with other people in today's webinar." points to the chat window; "The To field will tell you who will receive your message. Be mindful of who you are chatting to." points to the "To: All panelists" field; and "Your text can only be seen by panelists" points to the bottom of the chat window. At the bottom, there are buttons for "Audio Settings", "Click Here to adjust your audio settings", "Chat", "Raise Hand", "Q&A", "Click here to leave the session", and "Leave".

What's Going On: Choosing Understanding over Escalating and Punishing

Tunette Powell, PhD Director of Equity, Inclusion and Community at the Mirman School in Los Angeles

Walter Gilliam, PhD Elizabeth Mears & House Jameson Professor of Child Psychiatry and Psychology at the Yale University Child Study Center, Director of the Edward Zigler Center in Child Development and Social Policy

A few reminders about today's session...

- We have made every attempt to make today's presentation secure. If we need to end the presentation unexpectedly, we will follow-up using your registration information.
- All attendees are muted and videos are turned off.
- Have a question for the presenter? Use the Q&A feature.
- Need technical help? Use the chat to message panelists.
- We will leave a few minutes at the end to make sure you have all the links and resources you need and to allow time for an evaluation.
- Certificates of attendance and Washington in-service forms will be provided after you complete the evaluation.

Please Note:
The recording and slide deck will be posted on our
[event page](#) as soon as possible.

Land Acknowledgement

The UW SMART Center and Northwest MHTTC acknowledge that we learn, live, and work on the ancestral lands of the Coast Salish people who walked here before us, and those who still walk here. We are grateful to aim to respectfully live and work on these lands with the Coast Salish and Native people who call this home.

About the UW SMART Center

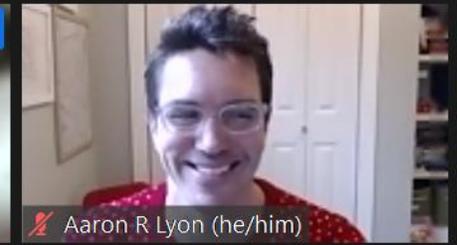

A national leader in developing and supporting implementation of evidence-based practices (EBPs) in schools, including prevention, early intervention, and intensive supports.

- Research & Evaluation
- Training and Technical Assistance
- Community Partnering and Outreach

The overarching mission of the School Mental Health Assessment, Research, and Training (SMART) Center is to promote high-quality, culturally-responsive programs, practices, and policies to meet the full range of social, emotional, and behavioral (SEB) needs of students in both general and special education contexts.

**1. Access &
Utilization
of Services**

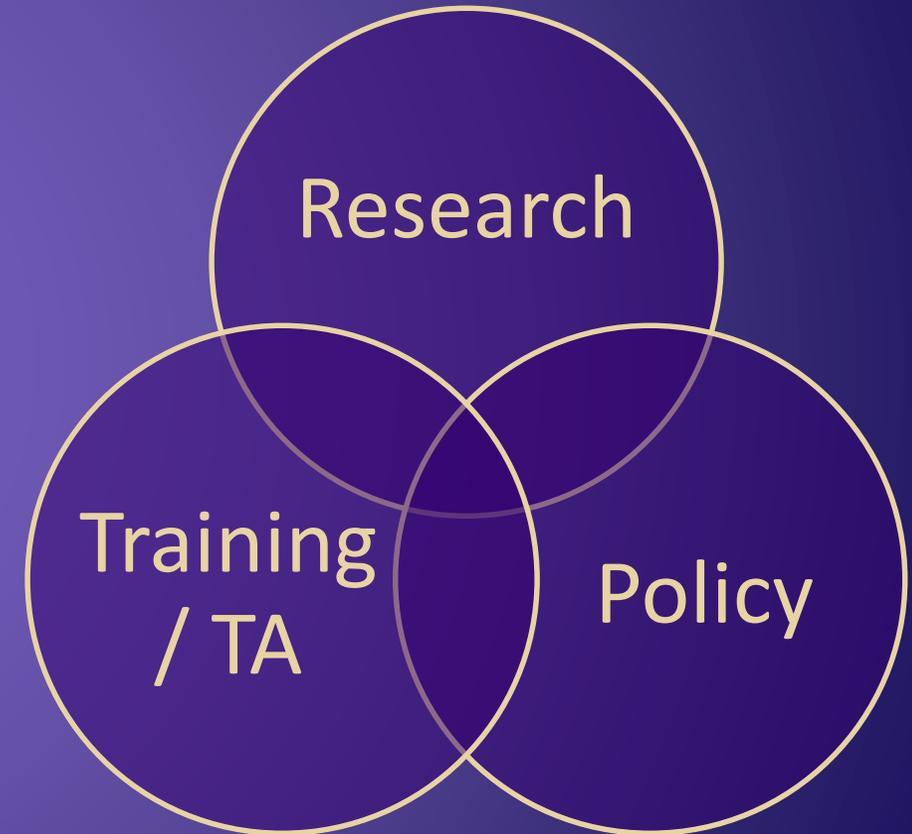

**2. Enhancing
Service
Quality**

Role of the SMART Center

- > **Set the context**
 - Basic research on SMH
- > **Generate evidence**
 - Develop and test models that “work”
- > **Mobilize evidence**
 - Provide research-based training and TA
 - Conduct research on implementation and technical assistance strategies
- > **Build political will**
 - Disseminate information broadly
 - “Be at the table” with funders and policy-makers

UW SMART Center Post-Doctoral Fellows

Advancing Mental Health Equity in Schools

Kimberly T. Arnold, PhD, MPH

Assistant Professor

Department of Family Medicine and Community Health

University of Pennsylvania Perelman School of Medicine

February 23, 2022

Personal Story

- Grew up in small rural town
- Absence of preventive mental health services at schools that I attended
- Didn't learn about the importance of mental health until graduate school

Objectives

01. The problems

Explain the burden of mental health challenges among children and adolescents and associated disparities in school mental health care.

02. Involving stakeholders in the solutions

State the importance of involving stakeholders in the development, selection, adaptation, implementation, and evaluation of evidence-based school mental health interventions.

03. Examples of solutions

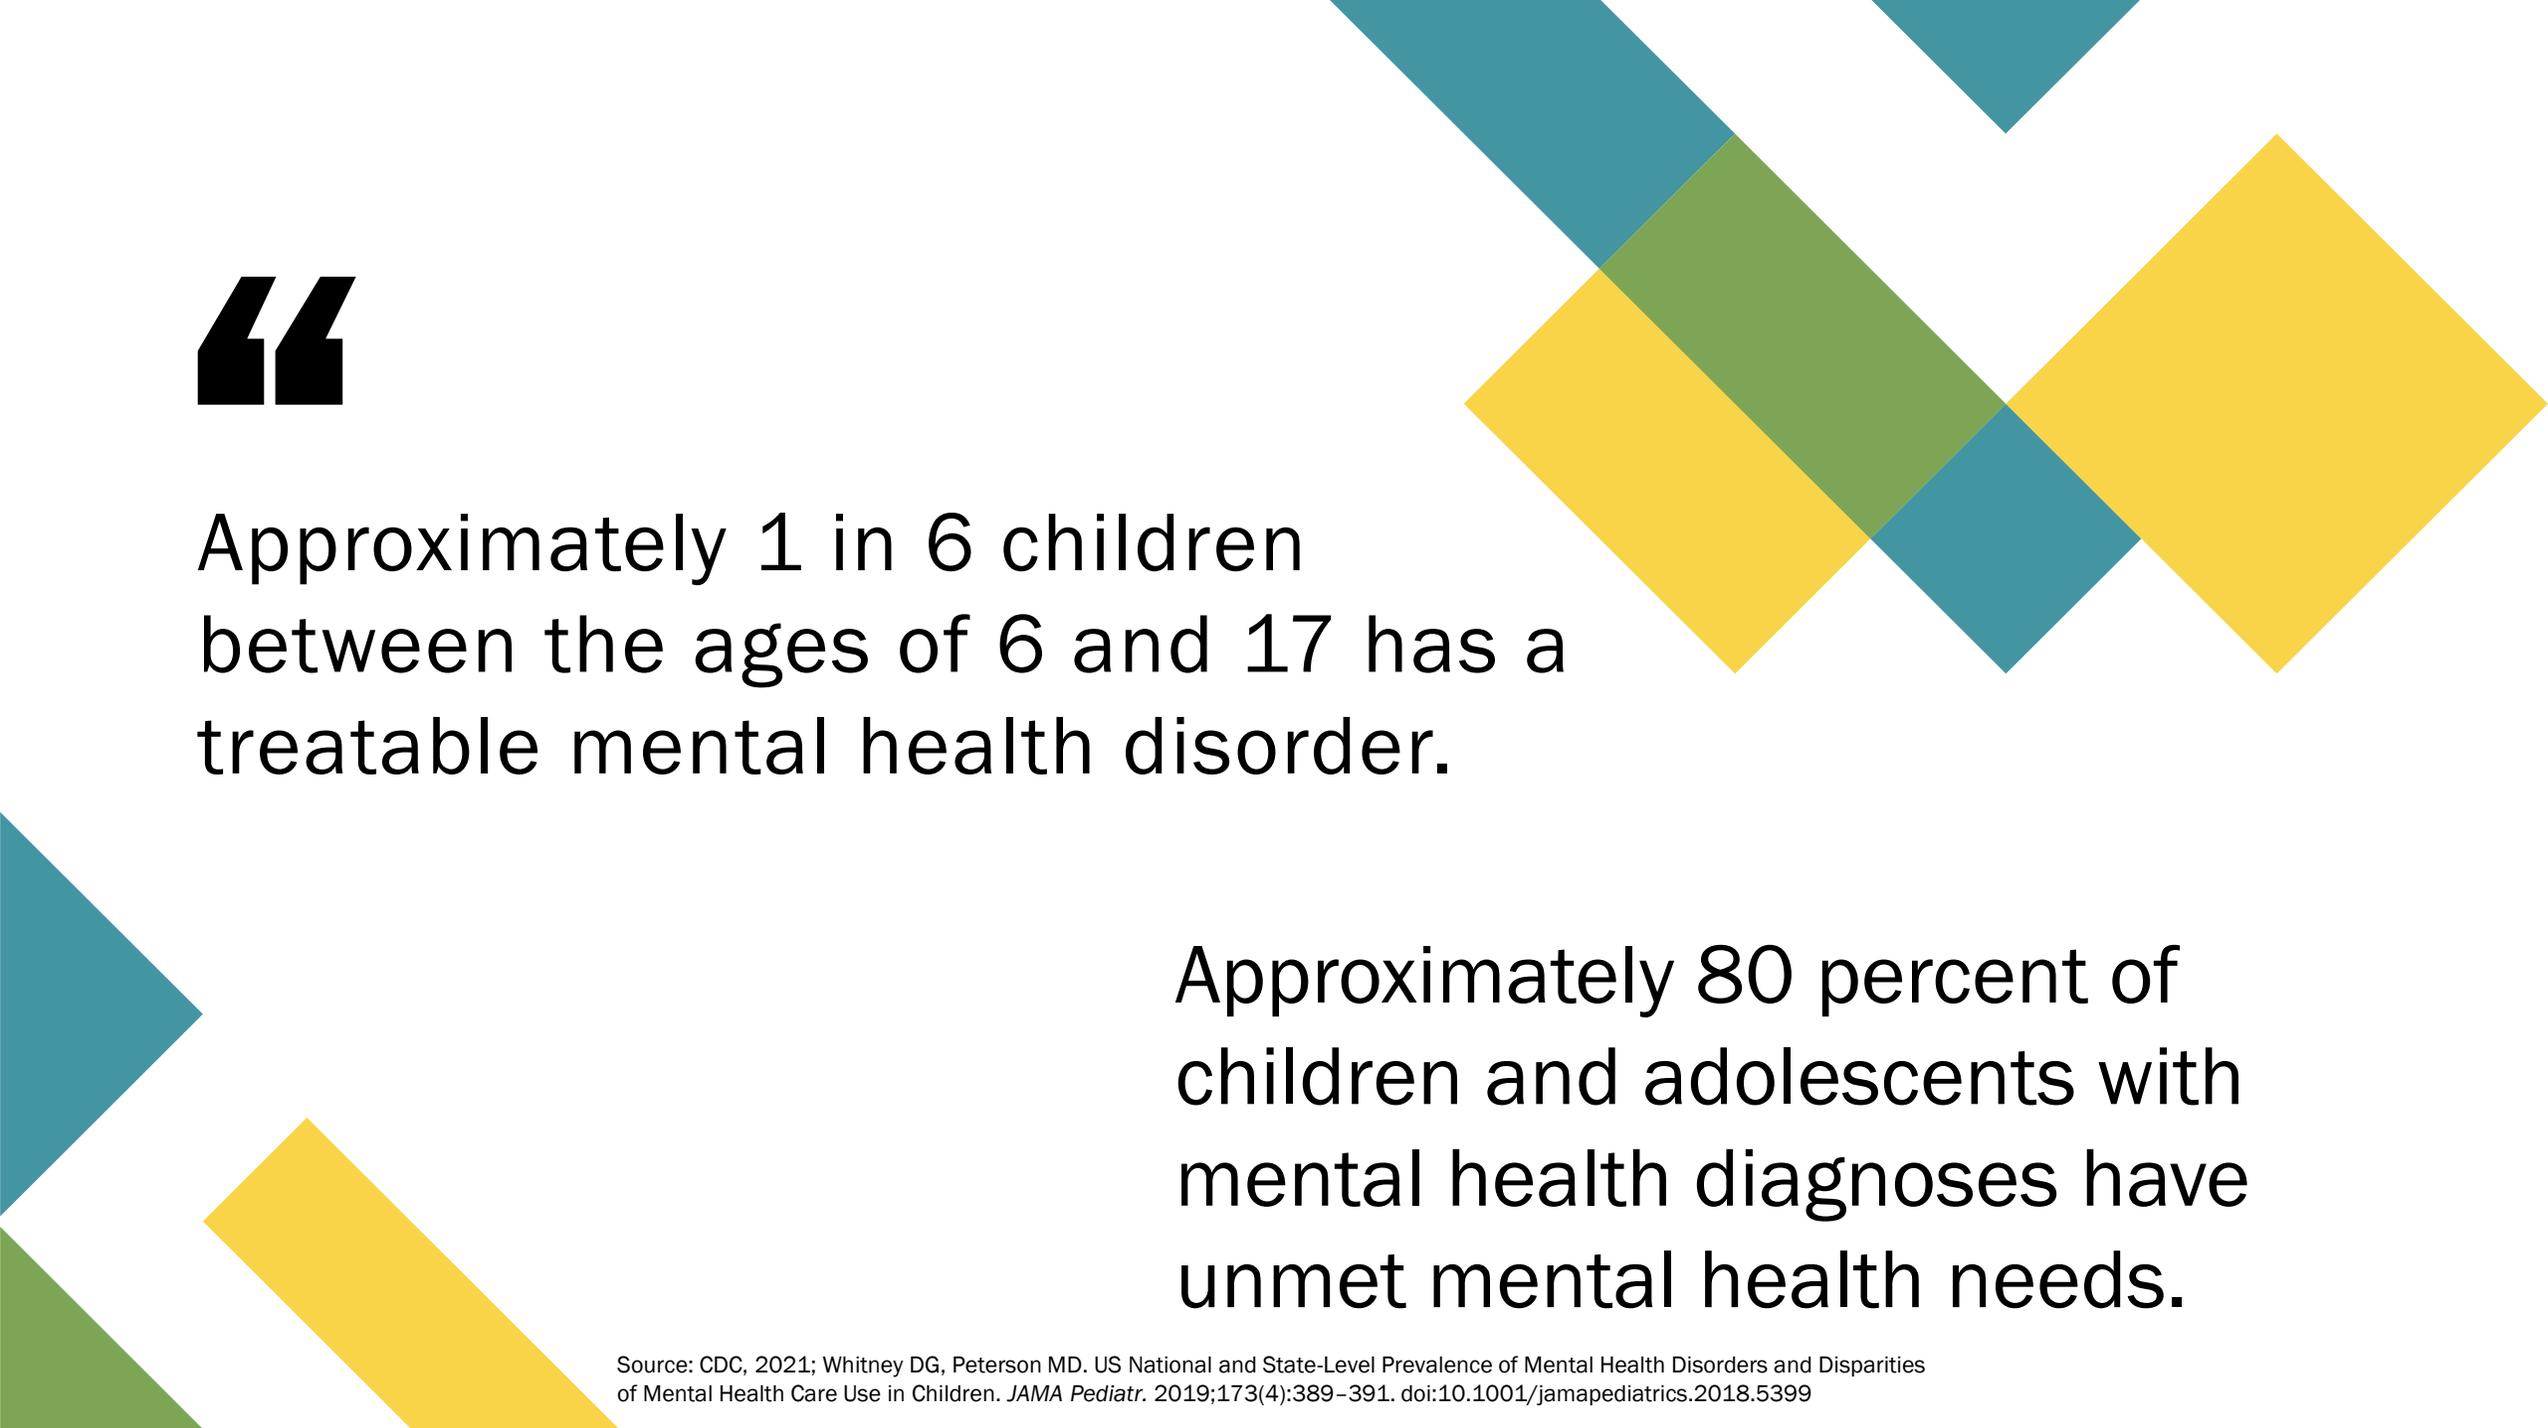

Discuss examples of policies, interventions, and implementation strategies to advance mental health equity in schools.

04. Adapting implementation strategies

Describe the Adapting Strategies to Promote Implementation Reach and Equity framework.

Children's mental health and school mental health disparities

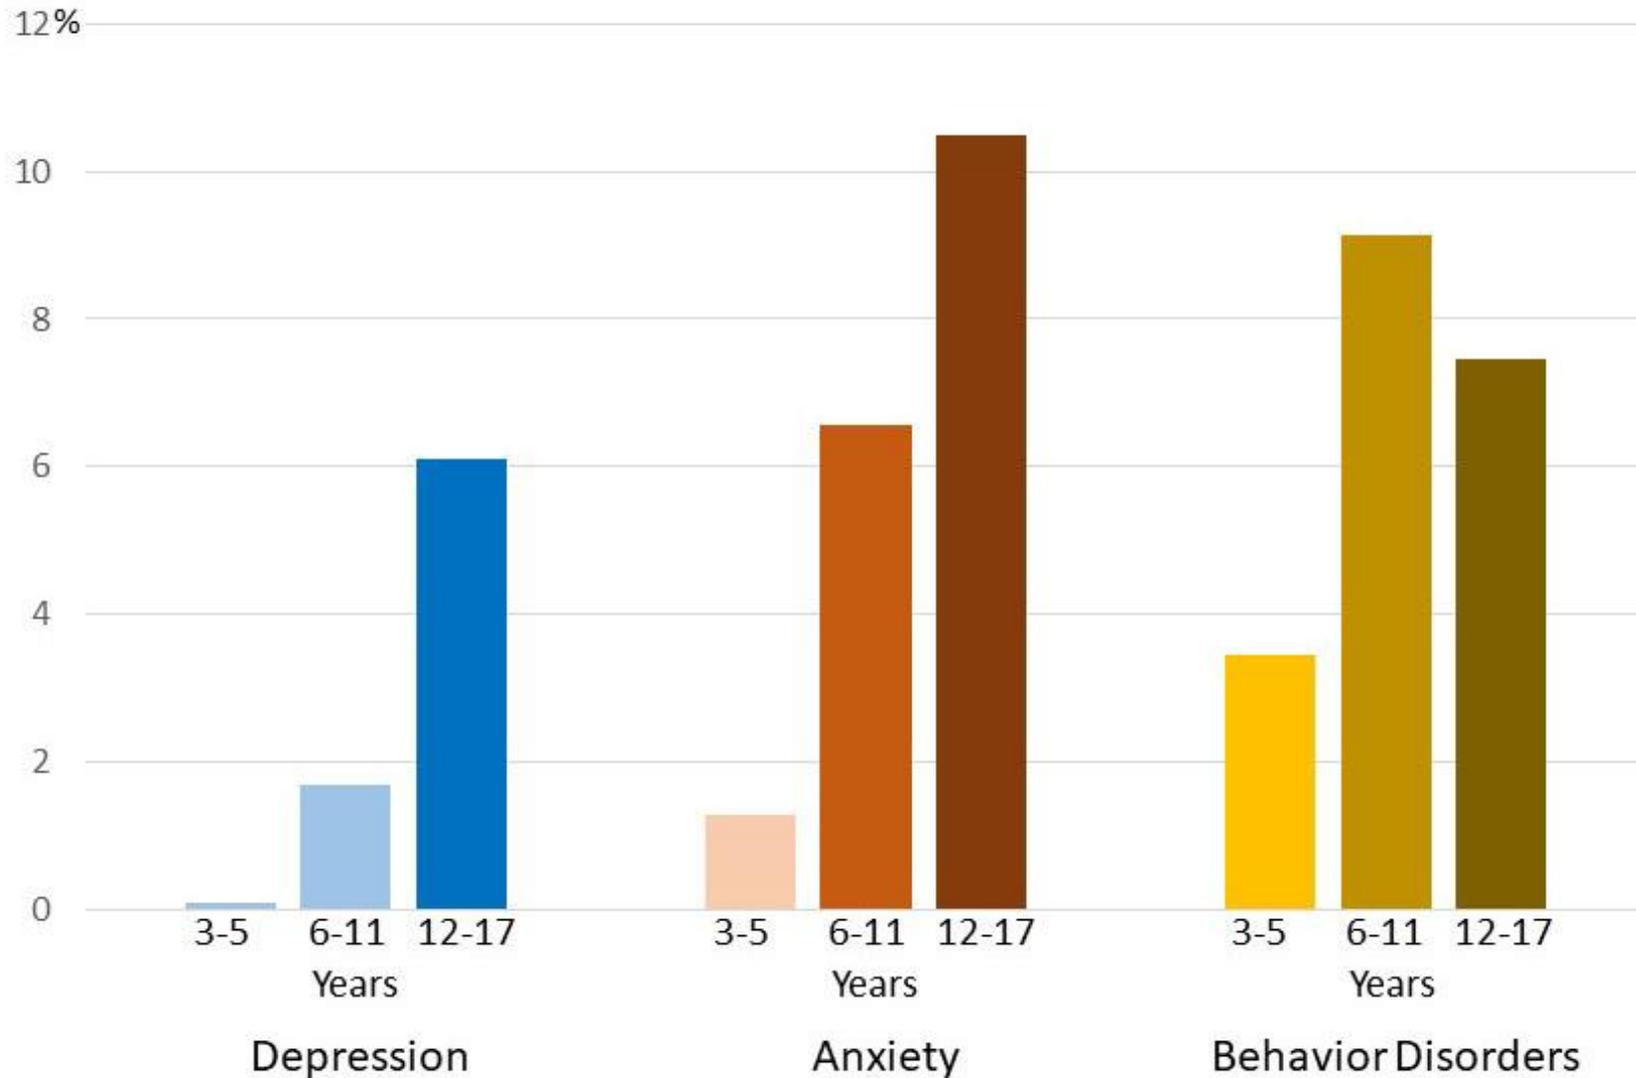

“

Approximately 1 in 6 children between the ages of 6 and 17 has a treatable mental health disorder.

Approximately 80 percent of children and adolescents with mental health diagnoses have unmet mental health needs.

Depression, Anxiety, Behavior Disorders, by Age

Rates of mental disorders among children vary with age

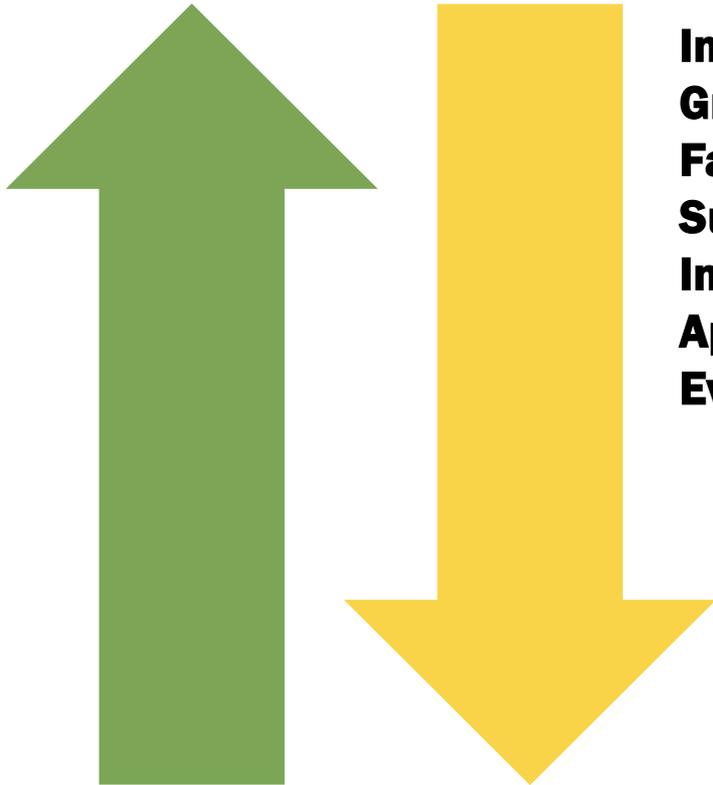

Children's mental health disparities exist by sex, socioeconomic status, and race/ethnicity

Among children aged 2-8 years, boys were more likely than girls to have a diagnosed mental, behavioral, or developmental disorder

Among children living below the poverty level, more than 1 in 5 had a diagnosed mental, behavioral, or developmental disorder

Children of color and children living below the poverty level are more likely to be exposed to trauma

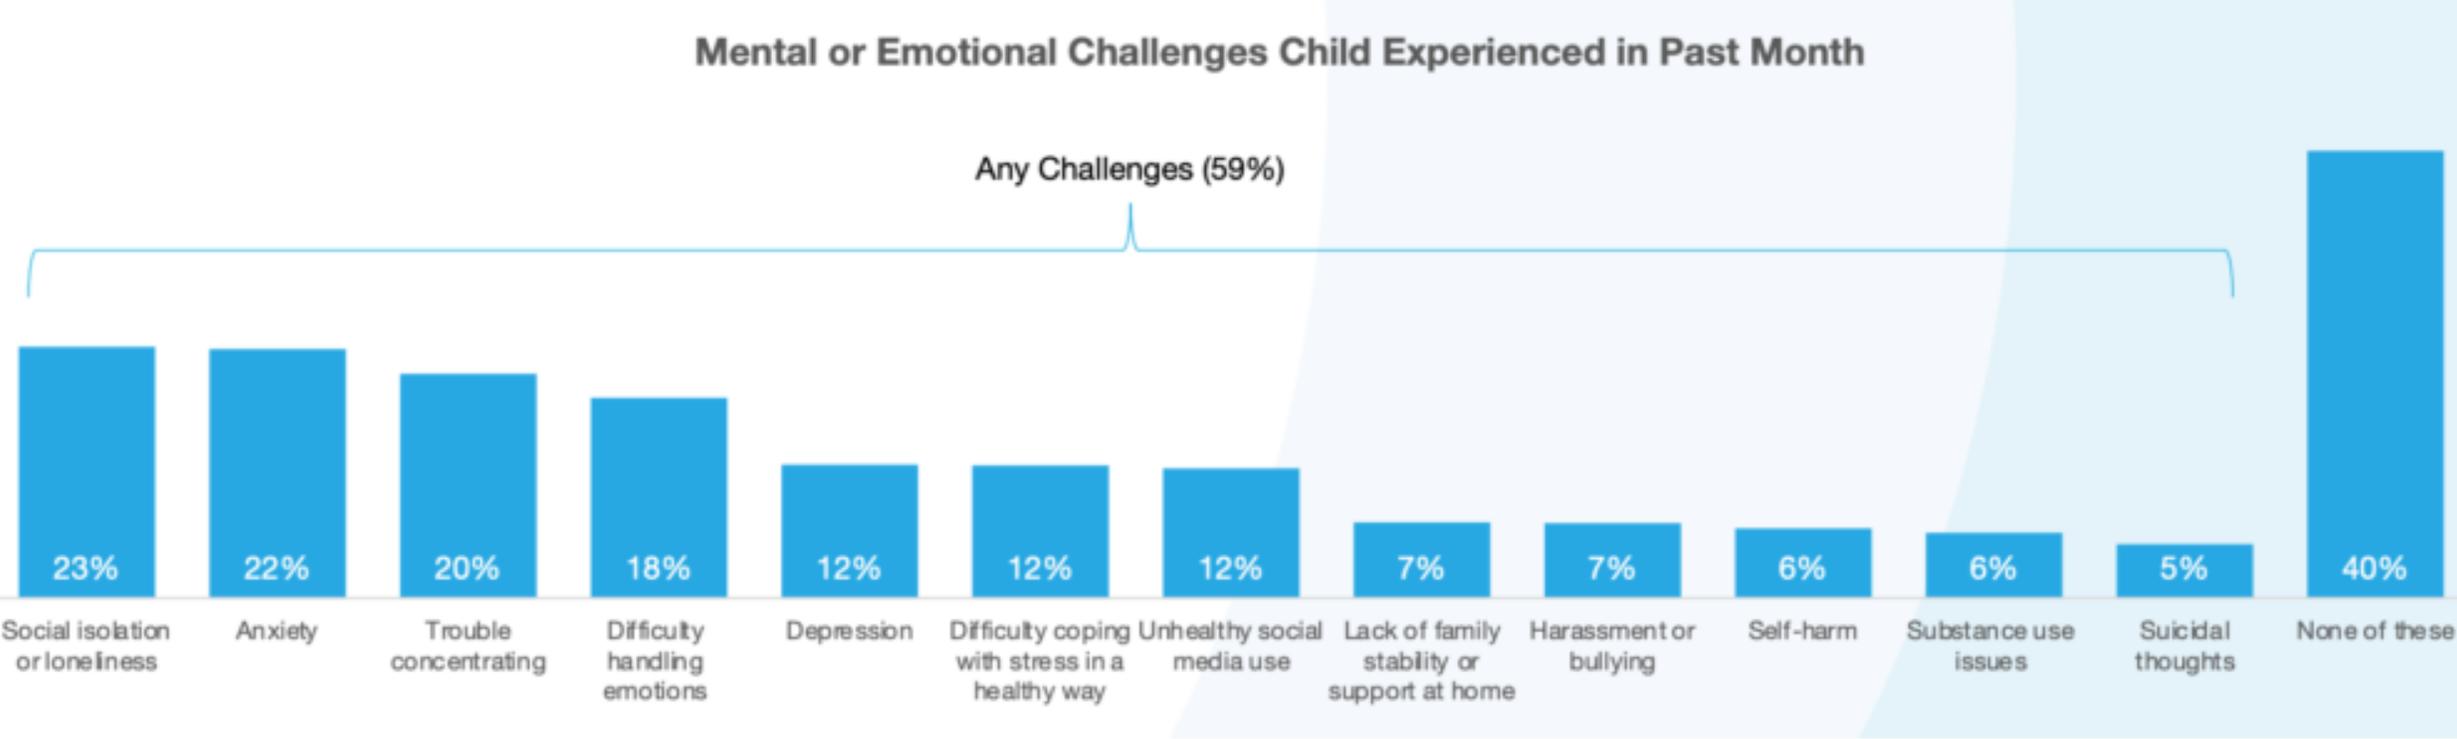

Children of color are disproportionately exposed to trauma and less likely to have access to mental health services

Abuse
Bullying
COVID-19
Discrimination
Food insecurity
Neglect
Neighborhood violence
Policy brutality
Poverty
Racism

Individual psychotherapy/counseling
Group therapy
Family therapy
Support groups
Intensive outpatient care
Appropriate psychiatric medication
Evidence-based mental health interventions

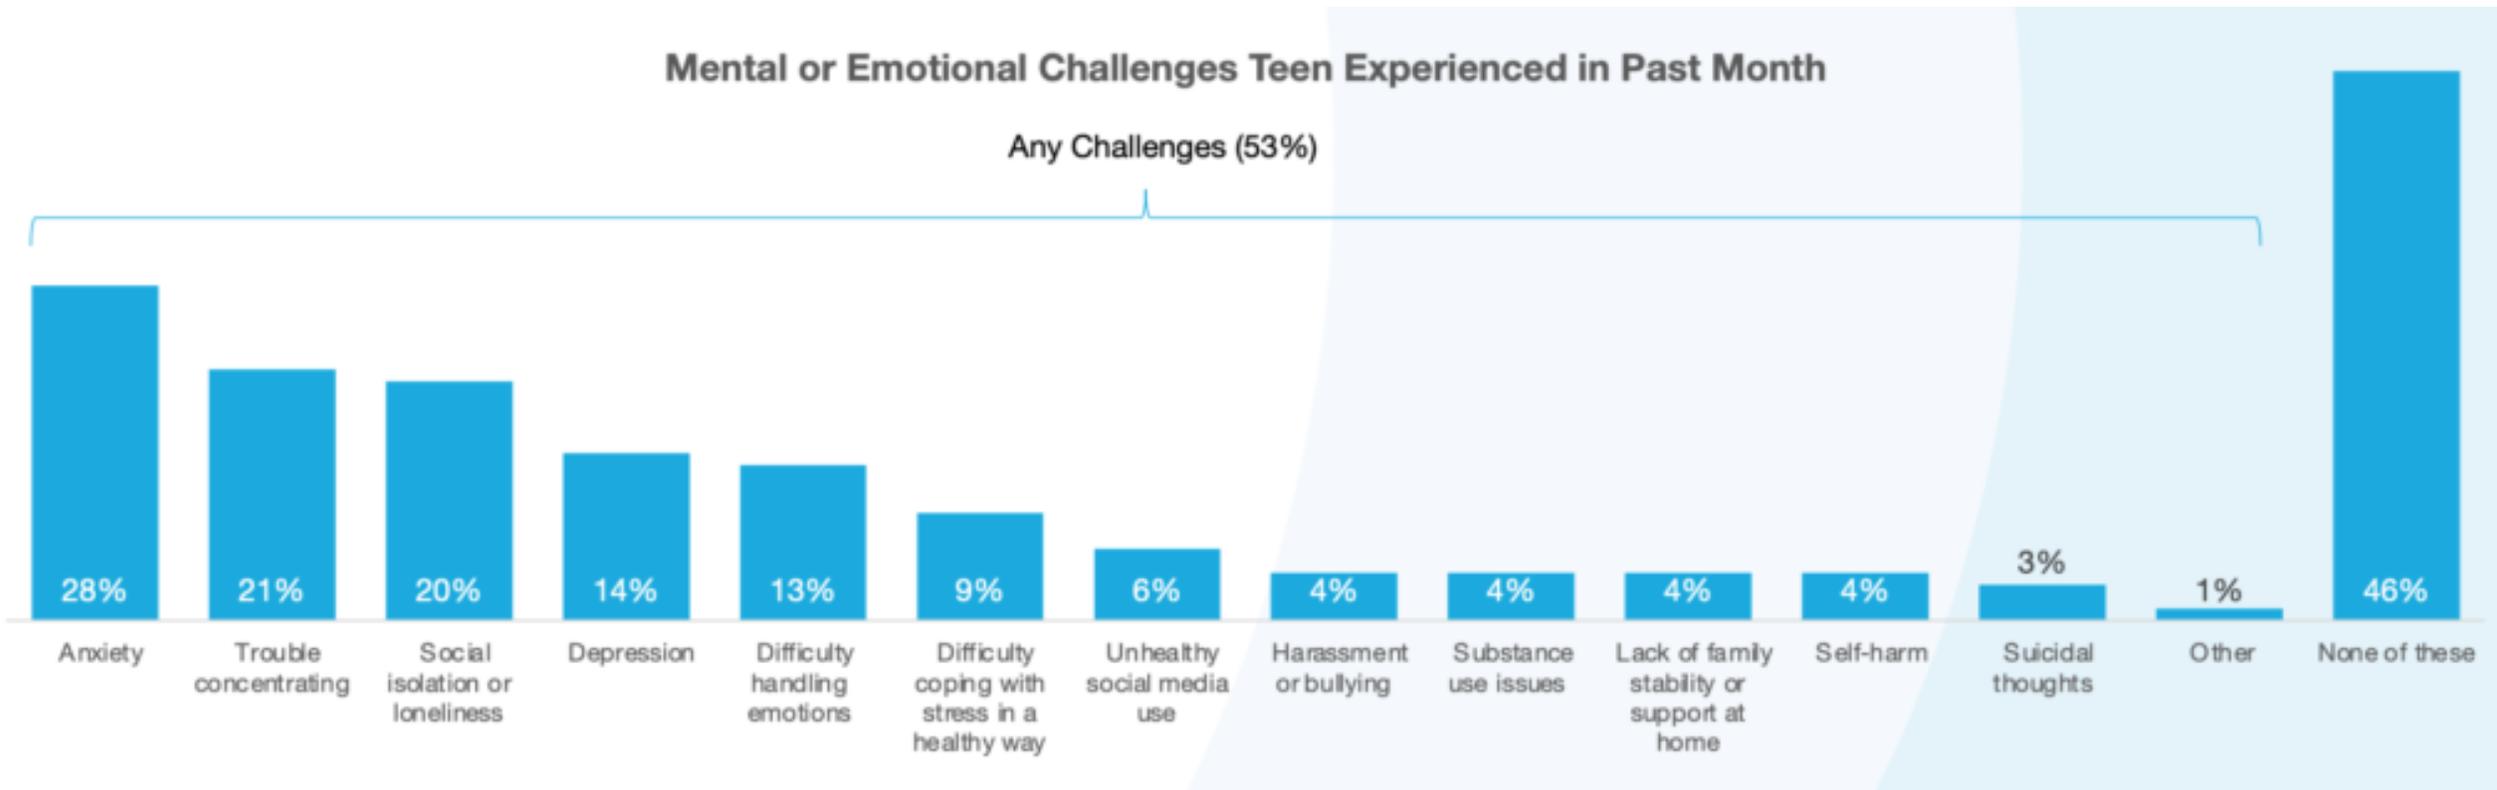

COVID-19 has increased mental health problems among children

*Respondents: parents of children ages 2-18

Source: <https://jedfoundation.org/news-views/national-survey-youth-well-being-during-covid-19/>

COVID-19 has increased mental health problems among teens

*Respondents: parents of children ages 13-18

COVID-19 has exacerbated mental health problems among children and adolescents

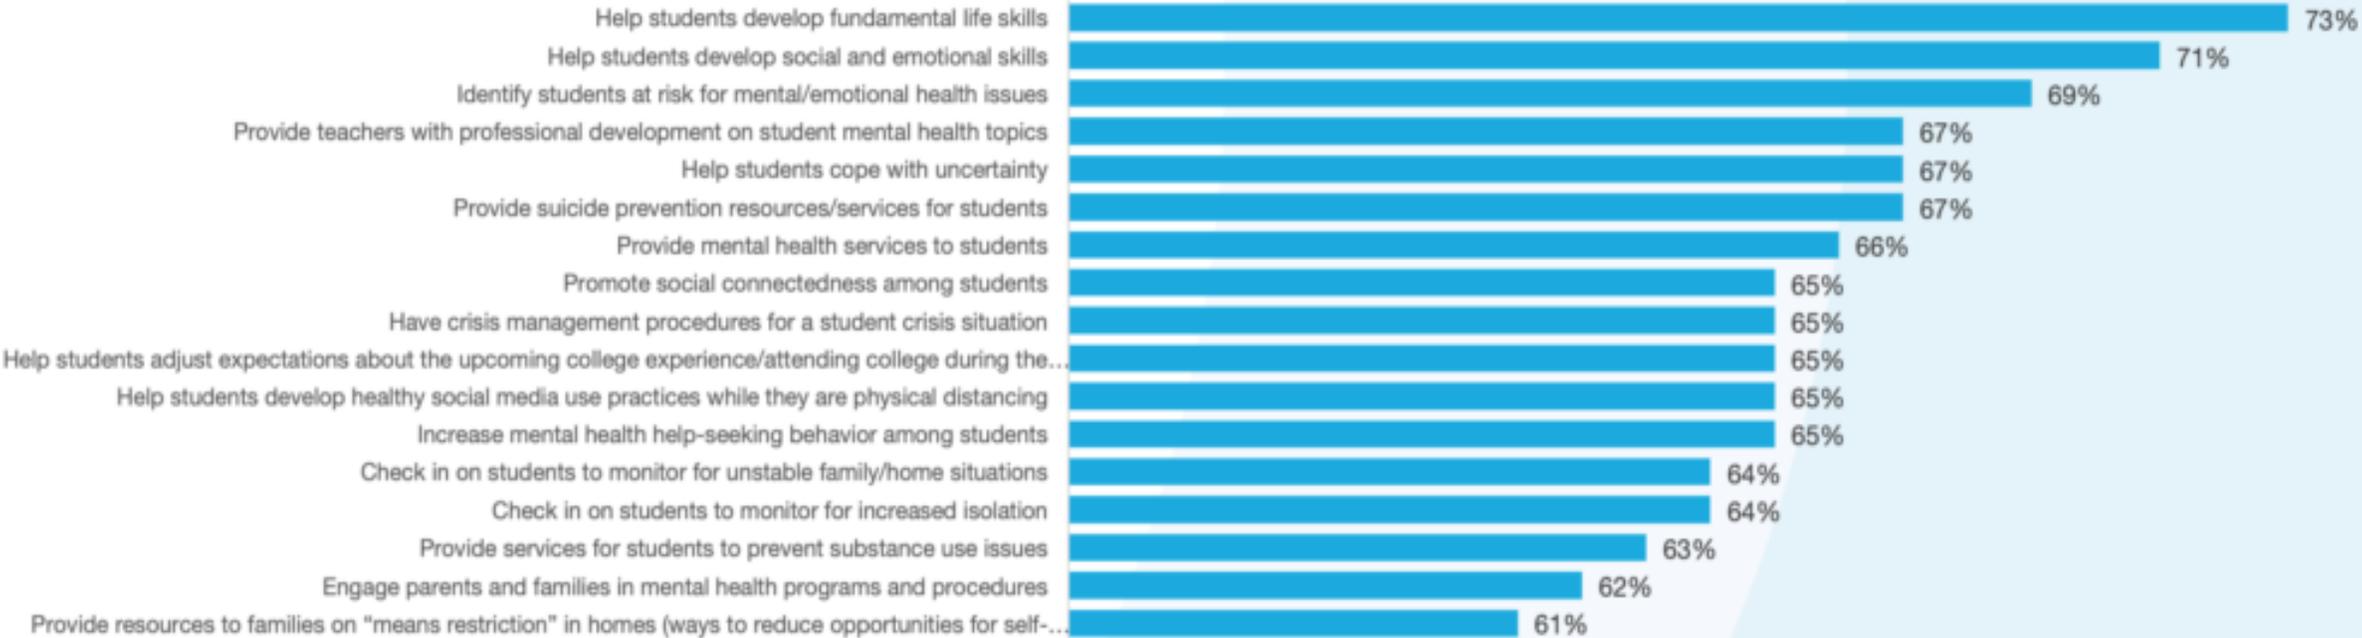

Child's Current Emotional/Mental Health Compared to Before the COVID-19 Outbreak

*Respondents: parents of children ages 2-18

Schools are an ideal setting to address children’s mental health challenges

Importance of School Efforts Related to Mental and Emotional Health
(% Absolutely Essential/ Very Important)

*Respondents: parents of children ages 2-18

Source: <https://jedfoundation.org/news-views/national-survey-youth-well-being-during-covid-19/>

Schools increase children's access to mental health services

- Children spend most of their time in schools
- Some children ONLY receive mental health services in school
- Schools can provide a multi-tiered system of support for mental health

TIER 3: INTENSIVE SUPPORT

KEY STRATEGIES:

Intensive individual and family tx; Trauma-specific treatment

KEY PARTNERSHIPS:

School Community, Community Mental Health Organizations, Families

TIER 2: EARLY INTERVENTION/IDENTIFYING STUDENTS AND STAFF AT-RISK

KEY STRATEGIES:

Screening Students; Group Interventions (CBT, STS Support), Threat Assessment, Peer Support

KEY PARTNERSHIPS:

School Community, Community Mental Health Organizations, Families

TIER 1: CREATING SAFE ENVIRONMENT AND PROMOTING HEALTHY AND SUCCESSFUL STUDENTS

KEY STRATEGIES:

Promoting Positive School Climate, Emergency Management, Psychological First Aid, Bullying Prevention, STS Education, General Wellness Support & Education

KEY PARTNERSHIPS:

School Community (Admin, teachers, counselors, coaches, nurses), Community Mental Health Organizations, Law Enforcement, Youth Development Organizations, Advocacy Groups (e.g., LGBTQ), Families

School mental health disparities

- Not all schools have mental health interventions
 - Rural vs. urban schools
 - Well-resourced vs. under-resourced schools
- Not all children in schools who are in need receive mental health services
- Evidence-based interventions for mental health are not being widely implemented and sustained in schools
- Shortage of school mental health professionals to provide services

Engaging stakeholders in school mental health interventions

Various stakeholders are involved in school mental health

Students

Parents and families

Teachers and other staff

School mental health professionals

School leadership

Involving stakeholders is beneficial

Demonstrates respect

Builds trust

Improves selection of implementation strategies

Improves implementation outcomes
(e.g., acceptability, feasibility, fidelity, appropriateness)

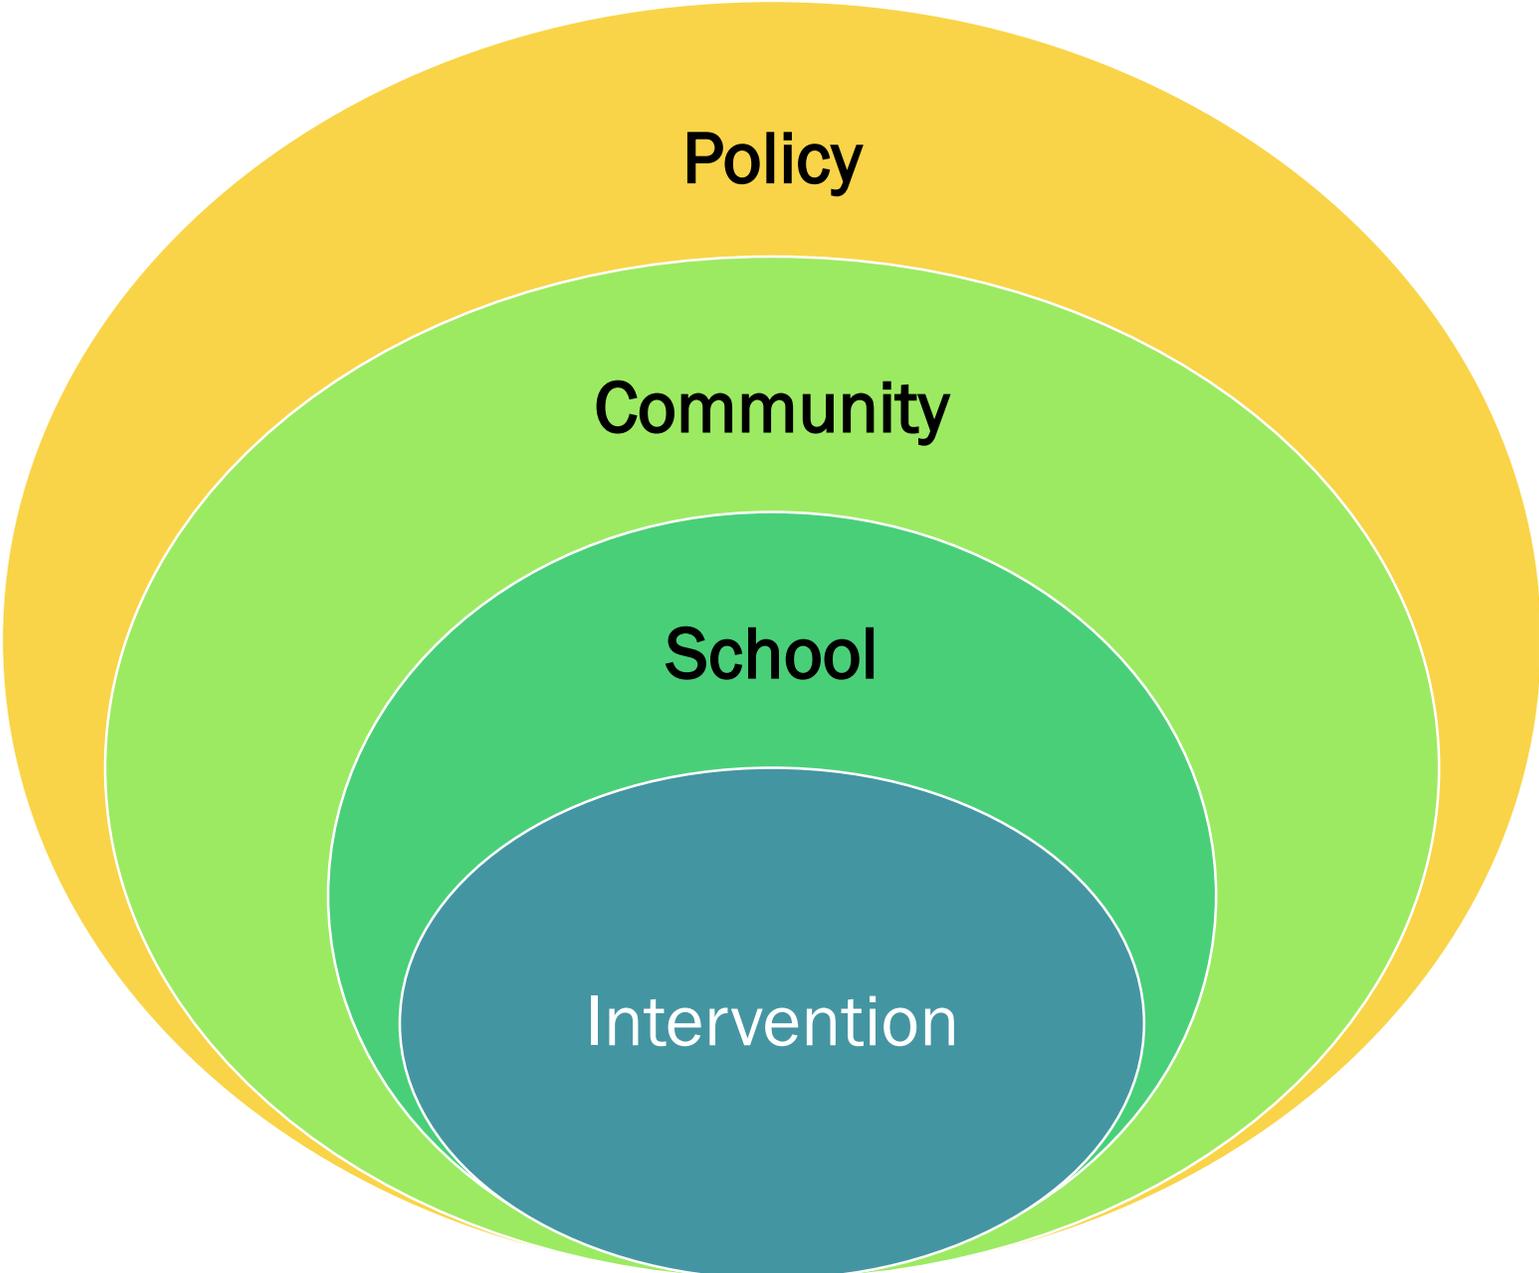

Improves clinical outcomes

Provides different perspectives on implementation efforts and outcomes

Multi-level strategies for advancing school mental health equity

School mental health equity can be advanced within and across multiple levels

Examples of policy solutions

- Leverage federal funding:
 - Substance Abuse and Mental Health Services Administration (SAMHSA)
 - Health Resources and Services Administration (HRSA)
 - Department of Education
 - COVID-19 recovery funds (.e.g., American Rescue Plan Act)
- Take advantage of state Medicaid funding
- Develop local policy at the district level to promote implementation and funding of school mental health services

ADVOCACY AND ACTION

ADDRESSING MENTAL HEALTH AROUND THE COUNTRY

From providing mental health days to increasing resources, cities and states are taking action in schools.

■ **ILLINOIS** Under a new law, public school students in the state will be allowed to take 5 mental health days per school year, starting in 2022. In March 2021, Chicago Public Schools announced a \$24 million plan to invest in mental health and trauma support programs for students and staff.

■ **MASSACHUSETTS** The state is aiming to pass legislation called the Thrives Act to establish an advisory council that will help implement behavioral health promotion, prevention, and intervention services in school districts.

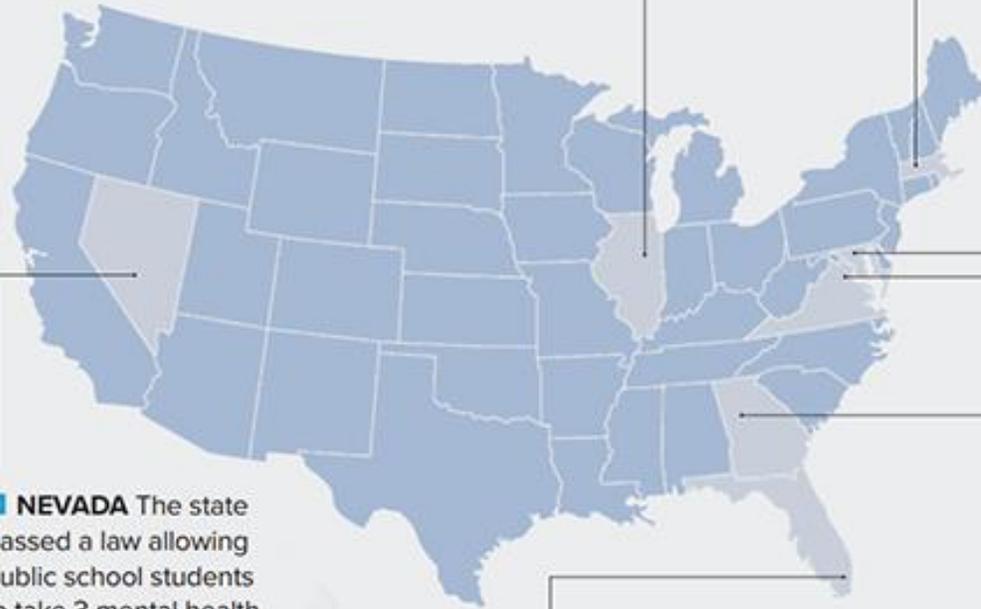

■ **MARYLAND** A new public-private partnership, Project Bounce Back, will direct \$25 million from the CARES Act to bring additional counselors and psychologists into schools and expand Boys & Girls Clubs to every Maryland county.

■ **VIRGINIA** Alexandria City Public Schools is redirecting funds from school police to mental health and mentorship programs.

■ **GEORGIA** Atlanta Public Schools plans to screen more than 30,000 pre-K to 12th grade students on their social-emotional behavior and has trained staff in trauma-informed practices.

■ **NEVADA** The state passed a law allowing public school students to take 3 mental health days per school year.

■ **FLORIDA** Miami-Dade County Public Schools provided staff with social-emotional learning and mental health awareness training and hired 45 new mental health coordinators.

Examples of community solutions

- Partner with community mental health agencies
- Partner with community groups and organizations such as the YMCA, Boys and Girls Club, Big Brothers Big Sisters of America
- Partner with faith-based organizations

Partnerships are key!!

Examples of school-wide solutions

- Establish multi-tiered systems of support for mental health
 - Implementing evidence-based interventions across all levels
 - Implement more trauma-informed and universal interventions
- Integrate mental health care in school-based health centers
 - Integrate screening and treatment for mental and physical conditions
- Create comprehensive school mental health systems
 - School-community collaborations that provide a continuum of services

Project POWER: Promoting Options for Wellness and Emotion Regulation

- School-based randomized controlled efficacy trial of RAP Club
- Over 800 8th grade students within 29 Baltimore City public schools were randomized to participate in one of two universal programs (2016-2019):
 - RAP Club – trauma-informed mental health intervention
 - Healthy Topics – general health education program

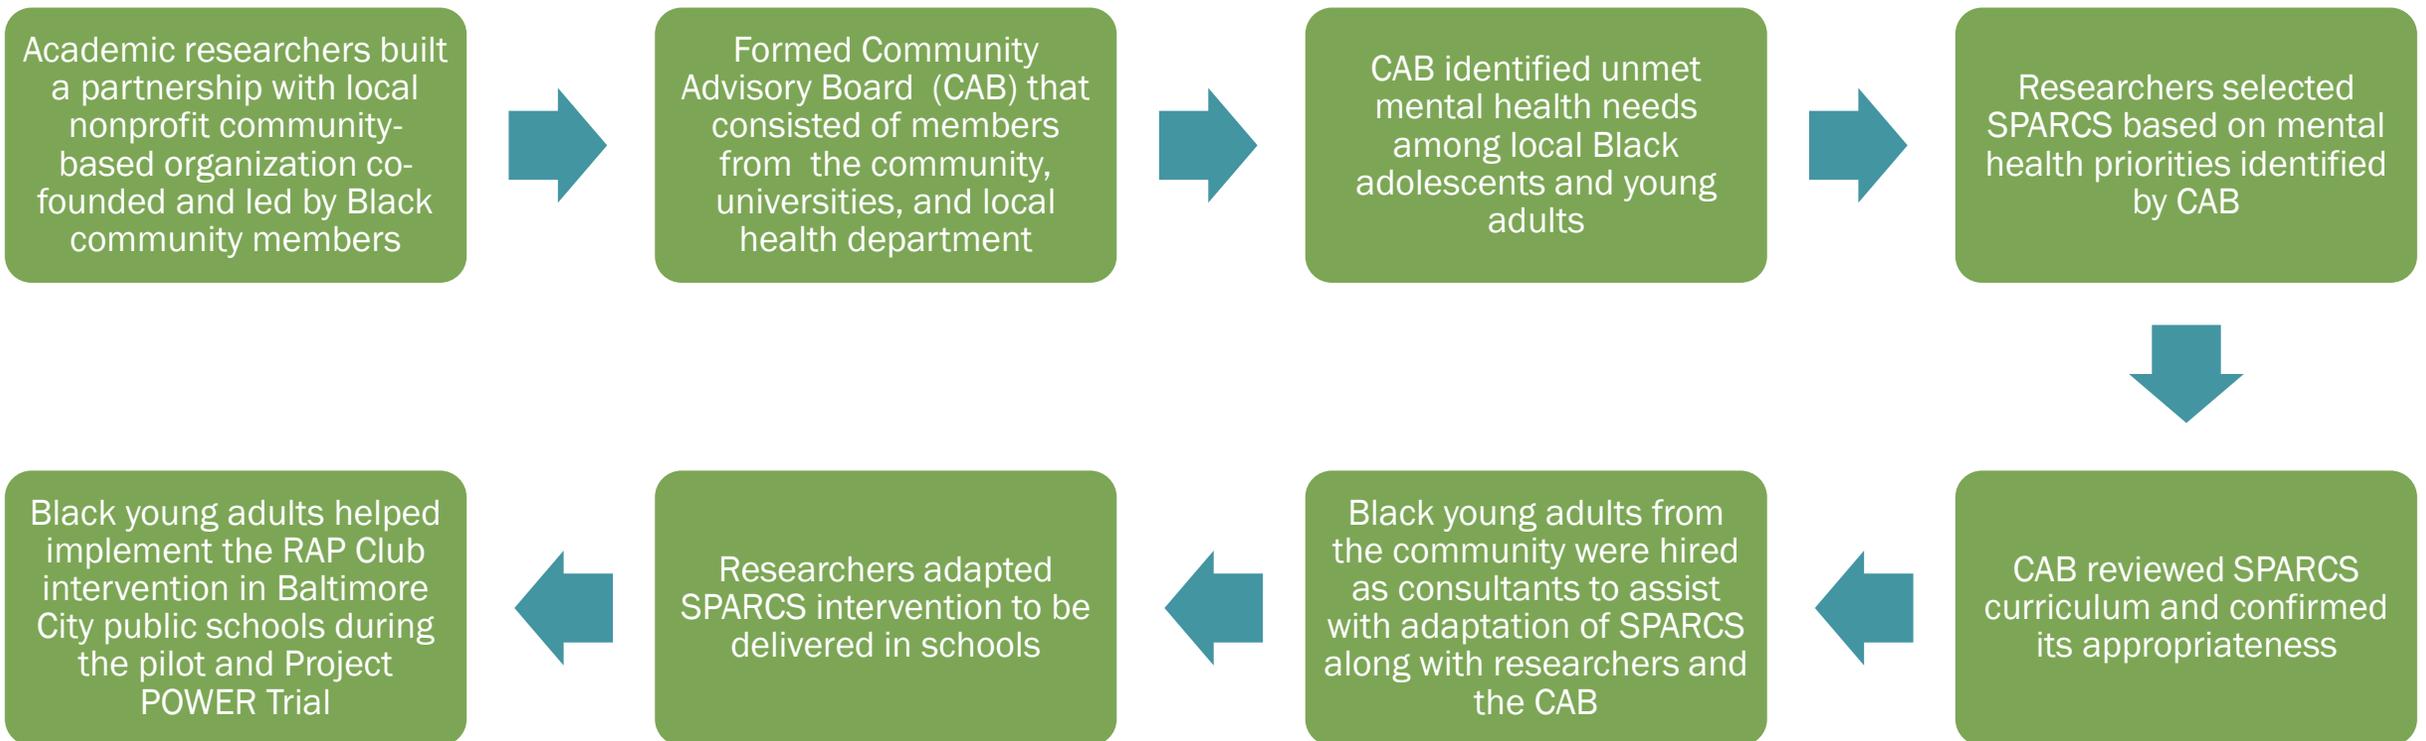

RAP Club was designed for adolescents living in low-income urban areas

- **Adapted** from Structured Psychotherapy for Adolescents Responding to Chronic Stress (SPARCS)
- Focused on **prevention** of potential negative effects of chronic stress and trauma exposure
- **12-session, group-based program** that can be delivered by a lay school staff member or mental health clinician along with a young adult community member

RAP Club is rooted in evidence-based mental health practices

Core Intervention Component	Evidence-Based Practice
Identifying stress	Psychoeducation
Awareness of emotional states	Mindfulness
Using a mindful approach	Mindfulness
Communication skills	Cognitive Behavioral Therapy
Problem solving skills	Cognitive Behavioral Therapy
Distress tolerance skills	Mindfulness and Cognitive Behavioral Therapy
	Mindfulness

Community-based Participatory Research approach was used to adapt RAP Club from Structured Psychotherapy for Adolescents Responding to Chronic Stress (SPARCS)

Adapting implementation strategies to advance equity in school mental health

Implementation Strategies

Methods or techniques used to enhance the adoption, implementation, and sustainability of a program or practice.

For a compilation of school-based implementation strategies, see:

- Cook, C. R., Lyon, A. R., Locke, J., Waltz, T., & Powell, B. J. (2019). Adapting a compilation of implementation strategies to advance school-based implementation research and practice. *Prevention Science, 20*, 914-935. doi: 10.1007/s11121-019-01017-1

Use evaluative and iterative strategies

- Assess for readiness and identify barriers and facilitators
- Obtain and use student and family feedback

Provide interactive assistance

- Centralize technical assistance
- Provide local technical assistance

Adapt and tailor to context

- Promote adaptability
- Tailor strategies

Develop Stakeholder Interrelationships

- Build partnerships
- Organize implementation team meetings

Train and Educate Stakeholders

- Conduct ongoing training
- Use train-the-trainer strategies

Implementation Strategies

Methods or techniques used to enhance the adoption, implementation, and sustainability of a program or practice.

For a compilation of school-based implementation strategies, see:

- Cook, C. R., Lyon, A. R., Locke, J., Waltz, T., & Powell, B. J. (2019). Adapting a compilation of implementation strategies to advance school-based implementation research and practice. *Prevention Science, 20*, 914-935. doi: 10.1007/s11121-019-01017-1

Support Educators

- Improve implementers' buy-in
- Targeting/improving implementer well-being

Engage Consumers

- Involve students, families, and staff
- Prep consumers to be active participants

Use Financial Strategies

- Access new funding
- Alter and provide incentives

Change Infrastructure

- Change/alter environment or site
- Develop local policy to support implementation

Adapting Strategies to Promote Implementation Reach and Equity (ASPIRE) Process

Step 1 Identify the underlying assumptions of the implementation strategy

Consider:

- How and why is the implementation strategy supposed to work and for whom?
- What would need to be true about the implementation strategy to promote equitable outcomes?

Step 2 Identify potential sources of disparities

Consider:

- Who is involved in the implementation strategy?
- What resources are necessary to engage in the implementation strategy?
- What is the process for enacting the implementation strategy?
- What are the potential outcomes of the implementation strategy?

Step 3 Adapt the implementation strategy to ensure that equity is considered in the underlying assumptions and has the explicit potential to reduce disparities

Consider:

- The necessary people and actors involved
- The process or steps that need to be enacted
- The outcomes that need to be considered

Promote Adaptability:

Identify the ways a new practice can be tailored or adapted to best fit with the school/classroom context, meet local needs, and clarify which elements of the new practice must be maintained to preserve fidelity

Step 1

Identify the underlying assumptions

- By promoting adaptations of the new practice, the core elements can be maintained to preserve fidelity, while other elements of the new practice are improved to fit better with the school context and meet the needs of students
- Assumes that adapters fully understand the implementation context & population

Promote Adaptability:

Identify the ways a new practice can be tailored or adapted to best fit with the school/classroom context, meet local needs, and clarify which elements of the new practice must be maintained to preserve fidelity

Step 1

Identify the underlying assumptions

- By promoting adaptations of the new practice, the core elements can be maintained to preserve fidelity, while other elements of the new practice are improved to fit better with the school context and meet the needs of students
- Assumes that adapters fully understand the implementation context & population

Step 2

Identify potential sources of disparities

- Adaptation may only include intervention developers or researchers, without input from school staff and students who best understand the implementation context
- Adapters may lack knowledge regarding culturally appropriate therapeutic processes, knowledge, attitudes, and beliefs

Promote Adaptability:

Identify the ways a new practice can be tailored or adapted to best fit with the school/classroom context, meet local needs, and clarify which elements of the new practice must be maintained to preserve fidelity

Step 1

Identify the underlying assumptions

- By promoting adaptations of the new practice, the core elements can be maintained to preserve fidelity, while other elements of the new practice are improved to fit better with the school context and meet the needs of students
- Assumes that adapters fully understand the implementation context & population

Step 2

Identify potential sources of disparities

- Adaptation may only include intervention developers or researchers, without input from school staff and students who best understand the implementation context
- Adapters may lack knowledge regarding culturally appropriate therapeutic processes, knowledge, attitudes, and beliefs

Step 3

Adapt the implementation strategy to ensure that equity is in the underlying assumptions and has the explicit potential to reduce disparities

- Using a participatory approach with representation from intervention developers, researchers, implementers, and recipients, identify the ways a new practice can be tailored or adapted to be culturally responsive to different racial/ethnic groups, best fit with the school/classroom context, build on local strengths and help address local challenges (with an emphasis on the priorities of underserved populations), and clarify which elements of the new practice must be maintained to preserve fidelity

Thank you

*“If you want to go fast, go alone.
If you want to go far, go together.”*

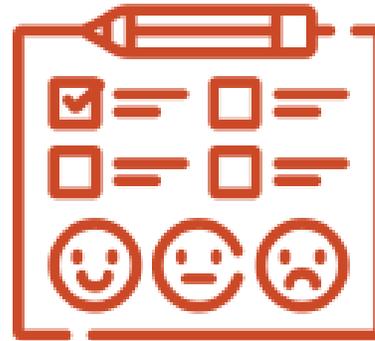

-African proverb
