

# Webinar Series

## Preventing and Responding to Family Violence During COVID-19

The webinars in this series will use case examples and dialogue between experts from the National Child Traumatic Stress Network (NCTSN) to address critical questions that mental health providers are facing during the COVID-19 pandemic. Via telehealth, providers are getting a glimpse into clients' home lives and they are encountering complex family interactions all during a time of stress and danger, with community supports challenged to respond.

NCTSN presenters help providers, even those not accustomed to working with children or families, with practical answers to questions such as:

- How to normalize stress and concerns about safety during this time?
- How to identify risk factors and signs of violence?
- How to identify intervention points and work in partnership with families?
- How to support conversations with parents and children about violence?
