

OUR MISSION

The National Hispanic and Latino Mental Health Technology Transfer Center (MHTTC) provides high-quality training and technical assistance to improve the capacity of the workforce serving the Hispanic and Latino communities in prevention, treatment, and recovery for behavioral health. We disseminate and support the implementation of evidenced-based and promising practices to enhance service delivery, promote the growth of a culturally sensitive and diverse workforce, and bridge access to quality behavioral health services. We strive to increase health equity and access to effective culturally and linguistically grounded approaches.
