IDENTIFY RISK FACTORS
Note those that can be modified to reduce risk.
- Current ideation, intent, plan, access to means
- Previous suicide attempt(s)
- Alcohol/substance abuse
- Previous history of psychiatric diagnosis
- Impulsivity and poor self-control
- Recent losses (physical, financial, personal)
- History of abuse (physical, sexual, emotional)
- Family history of suicide

IDENTIFY PROTECTIVE FACTORS
Note those that can be enhanced.
- Positive social support
- Spirituality
- Sense of responsibility to family
- Children in the home, pregnancy
- Life satisfaction
- Positive coping skills
- Positive problem-solving skills
- Positive therapeutic relationship

CONDUCT SUICIDE INQUIRY
Suicidal thoughts, plans, behavior, and intent.
- Ask Questions
  - Are you feeling hopeless about the present/future?
  - Have you had thoughts about killing yourself?
  - Have you thought of ways to kill yourself?

DETERMINE RISK LEVEL/INTERVENTION
Determine risk. Choose appropriate intervention to address and reduce risk.
- Ask...
  1. Have you decided how you would kill yourself?
  2. Have you decided when you would kill yourself?
  3. Do you have the items that you would need to follow through with your plan to kill yourself?
  - The more thought out the plan, the higher the risk.
