

Eagle ideas....

1. Develop a policy to adopt best practices for crisis response (e.g. Using SAMHSA's five principles guide)
 - a. Pilot this to see how well it works to get a 25% implementation and tipping point
2. Develop a Master Assessment to be used across organizations (LA County does this)
3. Change language...use Cannabis instead of marijuana, retail instead of recreational
4. Create a language auditing tool that can be used to review policies for stigmatizing language (and websites)
5. Strengthen and broaden collaborative efforts to discuss high system users and how to address them
6. Develop a policy so that there is a way for providers to find out system history for users
7. Engage schools more broadly in these efforts
8. Offer more language specific programming and education
9. Offer materials in Spanish on the front, English on the back
10. Provide treatment access across substances (not limit due to funding silos—such as providing MOUD and not meth treatment)
