

SOUTHEAST MHTTC SCHOOL MENTAL HEALTH *RESOURCE CATALOGUE*

THE SOUTHEAST MENTAL HEALTH TECHNOLOGY TRANSFER CENTER

The Southeast Mental Health Technology Transfer Center (MHTTC) is funded by the Substance Abuse and Mental Health Services Administration (SAMHSA). The mission of our center is to disseminate evidence-based mental health programs and practices to the eight states in Health and Human Services Region IV (Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee) through the provision of trainings and technical assistance as well as the development of resources. Our center is housed in the Department of Health Policy and Management at the Emory University Rollins School of Public Health.

The Southeast MHTTC School Mental Health Initiative is led by Dr. Janet Cummings, a mental health services researcher and national expert on mental health care access and quality among children and adolescents. Our team includes faculty and staff with expertise in public health, mental health systems, health economics, policy, finance, equity, implementation science, and autism spectrum disorder. As the regional MHTTC center that specializes in school mental health policy, finance, and workforce, many of the trainings and resources that we have developed address topics related to funding and sustainability of comprehensive school mental health systems.

SOUTHEAST MHTTC SCHOOL MENTAL HEALTH RESOURCE CATALOGUE

RESOURCE CATALOGUE OVERVIEW

This resource catalogue provides an index for the infographics, reports, toolkits, webinars, and slide decks that have been produced by the Southeast MHTTC School Mental Health Initiative since it was first funded in 2018. This document includes the embedded weblinks where each resource can be downloaded. All of the resources produced by the MHTTC are in the public domain and available at no cost to access and download. The resources that our center has produced are organized into the following five sections:

KEY RESOURCES (p. 3)

1 COMPREHENSIVE SCHOOL MENTAL HEALTH SYSTEMS: FOUNDATIONS (p. 6)

School mental health basics & youth mental health

Trauma-informed school mental health

2 MENTAL HEALTH SERVICES & SUPPORTS IN SCHOOLS (p.14)

Mental health promotion for all (i.e., Tier 1)

Early intervention & treatment (i.e., Tiers 2 & 3)

3 FUNDING, SUSTAINABILITY, & IMPACT (p. 17)

School mental health policy

School mental health financing

School mental health workforce

Data & measurement

4 DIVERSE POPULATIONS, EQUITY, AND INCLUSION (p. 33)

LGBTQ+ student mental health

Supporting neurodiverse students in the classroom

SOUTHEAST MHTTC SCHOOL MENTAL HEALTH

Key Resources

KEY RESOURCES

The following key resources offer training and guidance for states, districts, schools, and educators beginning the initial steps of developing and implementing school mental health systems. These free resources provide foundational strategies for supporting comprehensive school mental health. Both resources include supporting products released by the Southeast MHTTC School Mental Health Initiative to aid in implementation.

Classroom WISE

Classroom WISE

Classroom Well-Being Information and Strategies for Educators (WISE) is a free 3-part mental health literacy training package that assists K-12 educators in supporting the mental health of students in the classroom. Developed by the Mental Health Technology Transfer Center (MHTTC) Network in partnership with the National Center for School Mental Health, this package offers evidence-based strategies and skills to engage and support students with mental health concerns in the classroom.

Implementation Support Series: Classroom WISE (July-August 2021)

The Southeast MHTTC hosted Office Hours to support Classroom WISE adoption and implementation at the local and state levels in our region. These Office Hours provide a preview of the Classroom WISE modules and information to help develop a Classroom WISE implementation plan.

Implementation Guidance Modules

National School Mental Health Best Practices: Implementation Guidance Modules for States, Districts, & Schools

To help states, districts, and schools advance comprehensive school mental health, as well as engage in a planning process around implementation of services, the MHTTC Network Coordinating Office and National Center for School Mental Health developed the National School Mental Health Best Practices: Implementation Guidance Modules for States, Districts, and Schools (formerly known as the National School Mental Health Curriculum). The modules contain trainer and participant manuals, 8 module slide decks designed for delivery in one-hour sessions, and recorded virtual learning sessions that include a deeper dive into the module content. To access the Implementation Guidance Modules, click [here](#).

KEY RESOURCES (CONTINUED)

[MHTTC Network 8-part Training Series on SMH](#) (February-May 2021)

The MHTTC Network hosted an 8-part training series using the National School Mental Health Best Practices: Implementation Guidance Modules for States, Districts, and Schools. This resource was developed by the MHTTC Network in partnership with the National Center for School Mental Health (NCSMH) and aims to help states, districts and schools advance comprehensive school mental health and engage in a planning process for implementation. You can access the specific modules in the series or [learn more about the series here.](#)

[Module 1: Foundations of School Mental Health](#)

[Additional Learning Materials](#)

This module provides an overview of the National School Mental Health Best Practices: Implementation Guidance Modules resource, as well as the definition and core features of comprehensive school mental health.

[Module 2: Teaming](#)

[Additional Learning Materials](#)

This module reviews the definition and value of school mental health teams, as well as quality indicators and best practices to improve their efficiency and effectiveness.

[Module 3: Needs Assessment & Resource Mapping](#)

[Additional Learning Materials](#)

This module describes how to conduct and use data from needs assessment and resource mapping processes. The value of each is described as well as how they intersect to support school needs.

[Module 4: Screening](#)

[Additional Learning Materials](#)

This module describes the definition, purpose and importance of mental health screening in schools. Six action steps to conduct screening are provided, as well as strategies to address common barriers.

SOUTHEAST MHTTC SCHOOL MENTAL HEALTH *Key Resources*

KEY RESOURCES (CONTINUED)

[Module 5: Mental Health Promotion for All \(Tier 1\)](#)

[Additional Learning Materials](#)

This module reviews specific types of universal mental health promotion services and supports, followed by quality indicators and best practices.

[Module 6: Early Intervention & Treatment \(Tier 2 and 3\)](#)

[Additional Learning Materials](#)

This module reviews the importance of early intervention and treatment services and supports for students with mild distress, functional impairment, or at risk.

[Module 7: Funding & Sustainability](#)

[Additional Learning Materials](#)

This module includes the definition of school mental health funding and sustainability and opportunities to secure and leverage diverse funding sources and to sustain successful school mental health systems.

[Module 8: Impact](#)

[Additional Learning Materials](#)

This module explains the purpose and value of documenting and sharing information about the impact of your comprehensive school mental health system.

[National School Mental Health Best Practices: Implementation Guidance Module Resource Index](#)

This document is an index to help users search and locate specific resources referenced within each module of the National School Mental Health Best Practices: Implementation Guidance Modules for States, Districts, and Schools.

TOOLKITS

[Communicating About School Mental Health - A Graphic Toolkit](#) (November 2021)

This toolkit provides recommendations on how to translate complex concepts about children's mental health and school mental health into visual aides to enhance understanding. This graphic tool is designed to help you communicate with teachers about their role and the role of other adults on campus in supporting school mental health.

SHORT REPORTS

[Factors Related to Need for Mental Health Services among School-Age Children in the Southeast: Data from the 2021 Youth Risk Behavior Surveillance System](#) (August 2023)

This brief report examines the reported prevalence of sadness and hopelessness, suicidal ideation, bullying, fighting, and current substance use among high school age youth in the Southeast region's eight states. These data are derived from the 2021 Youth Risk Behavioral Surveillance System.

[Factors Related to Need for Mental Health Services among School-Age Children in the Southeast: Data from the 2019 Youth Risk Behavior Surveillance System](#)

(October 2020)

This brief report examines the reported prevalence of sadness and hopelessness, suicidal ideation, bullying, and fighting among high school age youth in the Southeast region's eight states. These data are derived from the 2019 Youth Risk Behavioral Surveillance System.

[What are School Mental Health Services?](#) (September 2020)

School mental health services are very heterogeneous, ranging from population-level school climate interventions to intensive interventions for individual students. This short report illustrates terminology commonly used to classify school mental health services into three tiers.

SHORT REPORTS CONTINUED

[School Mental Health Improves Treatment Access & Engagement](#) (June 2020)

This short report provides findings from research studies on how school mental health improves treatment access and engagement for youth.

[Data from the 2018 Youth Risk Behavior Surveillance System](#) (September 2019)

These short reports provide statistics on the need for mental health services among school age children across the Southeast region. The fact sheets contain data from the Youth Behavior Risk Surveillance System (Year 2018 Data).

WEBINARS

[Communication 101 for School Mental Health: School Administrators Perspective](#) (January 2023)

How school administrators show up to lead school mental health initiatives is key to these initiatives' impact and sustainability. Ensuring wellness for students in support of their learning and development is the responsibility of all adults on campus. School leadership may set the tone for how school mental health is prioritized and integrated. Whether you are in an administrative role, or in a position to inform or partner with school leaders, this session applies a school leadership lens to universal components of school mental health. It reviews core dimensions of school mental health and connects you to relevant resources. Participants will be able to communicate about the importance of student mental health in academic achievement, core concepts related to school and student mental health, and funding considerations, and they will be able to reference examples of school mental health strategies. We will discuss common questions, issues, and opportunities facing leadership who are starting or continuing efforts to advance school wellness.

[Communicating about School Mental Health](#) (July-August 2021)

This series provides state and local education agencies with information about how to most effectively communicate about school mental health to audiences who may not have a background in education or mental health. It provides strategies and tools that help navigate pitfalls and craft messaging likely to raise awareness, increase engagement, and convey the value of improving student wellness.

[Part I: Communication 101 for School Mental Health: Engaging Adults on Campus Who Do Not Have a Mental Health Background](#) (July 2021)

Part I shares key considerations for how to communicate about children's mental health in ways that resonate with individuals who are not mental health professionals. It provides strategies and tools for making sure that teachers, principals, parents, caregivers and other allies learn what you would like them to know about school mental health and student wellness.

[Part II: Making Sense of School Mental Health: A New Graphic Tool on the Role of Teachers](#) (August 2021)

Part II provides recommendations on how to translate complex concepts about children's mental health and school mental health into visual aides to enhance understanding. In this session, we provide a new graphic tool designed to help you communicate with teachers about their role and the role of other adults on campus in supporting school mental health. Participants will be able to access and implement the graphic tool with a full suite of support tools. [View graphic tool here.](#)

[Implementation Support Series: Classroom WISE](#) (July-August 2021)

The Classroom Well-Being Information and Strategies for Educators (WISE) Implementation Support Series is a mental health literacy training for teachers and school staff that will be a key component of all school reopening plans in the 2021-22 school year. The free, 6-hour course, Classroom WISE, has been released by the Mental Health Technology Transfer Center Network Coordinating Office. The Southeast MHTTC hosted Office Hours to support Classroom WISE adoption and implementation at the local and state levels in our region. These Office Hours provide a preview of the Classroom WISE modules and information to help develop a Classroom WISE implementation plan.

COMPREHENSIVE SCHOOL MENTAL HEALTH SYSTEMS: FOUNDATIONS

TRAUMA-INFORMED SCHOOL MENTAL HEALTH

WEBINARS

[The Community Resiliency Model \(CRM\) for Schools](#) (December 2022)

The Community Resiliency Model (CRM)® is a skills-based wellness and prevention program that provides a biological, non-stigmatizing perspective on normal human reactions to stress and trauma. The primary focus of this stabilization program is to learn to reset the natural balance of the nervous system. CRM skills help people understand their nervous system and learn to track sensations connected to their own wellbeing. CRM, developed at the Trauma Resource Institute by Elaine Miller-Karas is both restorative and preventive (Miller-Karas, 2015). CRM is a low-intensity intervention which teaches easy-to-learn skills to manage the agitation, anxiety, numbness, sadness, and despair of emotional dysregulation, which can be brought on by stressful personal or professional situations. CRM is trauma-informed and resiliency-focused. CRM skills are useful for self-care. They can be taught as a peer-to-peer program in a variety of contexts. School workers, healthcare providers, educators, and other frontline helpers can apply CRM skills in any setting: schools, medical/counseling centers, pre-school settings, home visits, faith communities, and crisis situations in the field. The skills can help prevent burnout. CRM is a valuable resource for individuals coping with chronic stressors such as physical pain, addiction, and grief and loss. A range of persons that suffer the effects of cumulative trauma (e.g., violence, poverty, racism, homophobia) benefit from these tools.

[Promoting School Preparedness, Community Resilience, & Recovery in the Face of Adversity \(6-Part Series\)](#) (June – November 2022)

Schools play an important role in supporting student resilience and wellbeing following community-wide trauma and adversity, but the road from preparedness to recovery begins long before a crisis event occurs, and the response lasts well after the event is over. This six-part series focuses on the role of schools and school mental health providers throughout crisis planning and response and offers a framework for planning that is part of a larger trauma-informed and healing-centered approach to education and school mental health. Presenters will highlight crisis planning efforts and examples across the Southeast region and nationally to promote collaborative learning.

1

COMPREHENSIVE SCHOOL MENTAL HEALTH SYSTEMS: FOUNDATIONS

TRAUMA-INFORMED SCHOOL MENTAL HEALTH (CONTINUED)

WEBINARS CONTINUED

[Part I: Essentials](#) (June 2022)

The first session will provide foundational information about collective trauma, how it affects members of a school community, the role of schools in crisis planning and response, and best practices in school crisis responses (including healing-centered school programming).

[Part II: Improving Readiness](#) (July 2022)

With natural and man-made crisis events increasing in frequency, schools and school mental health providers are being called upon to meet both the physical safety and social-emotional needs of students following exposure to a crisis event. Part of that readiness is a well-developed crisis plan combined with healing-centered and resilience-promoting policies and programming. This training will review best practices for planning and highlight resources that will help school mental health providers build their toolboxes for crisis readiness and response.

[Part III: Response](#) (July 2022)

This session will provide practical information about responsive practices and supportive resources to promote collective resilience during episodes of hardship and trauma. We will discuss the responsibility we have to our students, our colleagues, and ourselves when faced with urgent or ongoing stressors. Our focus will be on culturally responsive approaches, opportunities for iterative learning and improvement, and feature local and state examples in the Southeast and nationally.

[Part IV: Recovery & Maintenance](#) (July 2022)

This session will provide practical information about best practices and key resources to promote family-school-community collaboration for collective resilience during the long-term recovery and maintenance phase of an experience with collective trauma. We will share trauma training resources for school professionals and community members, explain strategies and complementary resources for data-driven, iterative learning and planning, and feature local and state examples in the Southeast and nationally.

COMPREHENSIVE SCHOOL MENTAL HEALTH SYSTEMS: FOUNDATIONS

TRAUMA-INFORMED SCHOOL MENTAL HEALTH (CONTINUED)

WEBINARS CONTINUED

[Part V: The fourth “R” in our School Mental Health Crisis Continuum of Care: Renewal](#) (October 2022)

After readiness, through response and beyond recovery, renewal work asks us to focus on structural changes and procedures, coordinating policy, processes, and practices that center regeneration and healing. Together, we explore the seven elements foundational to trauma-informed school crisis recovery and renewal, including meaning-making (Neimeyer, 2001), building and fostering resilience (Ungar, 2011), post-traumatic growth theory (Calhoun & Tedeschi, 2006), and organizational change after crisis and healing-centered school approaches.

[Part VI: Leading Ourselves & School Communities Through & After Crisis Towards Healing](#) (November 2022)

School crises can be interrupters or the norm, depending on the school and its community context. Whether the crisis is acute, chronic, or complex, there are shared leadership practices, policies, and paradigm shifts that can support all stakeholders' efforts to successfully navigate a crisis. Leading school communities through crisis recovery and renewal while responding is hard and complex. We don't need to hold this work alone (even though...we often do!). In this webinar, we explore these essential questions: *What makes our leadership trauma informed- always, in the wake of, and in the aftermath of crisis? How might we continue our trauma-informed leadership during and after a crisis has ended (e.g., COVID 19, a student death, hurricane) to strengthen our school climate?*

[Trauma-Informed Schools Webinar Series](#) (October 2019)

This webinar series defines adverse childhood experiences and child trauma, describes how they impact student health, learning, and behavior, and discusses how schools can respond by becoming trauma informed.

[Part I: Trauma Awareness & Key Considerations](#) (October 2019)

[Part II: Trauma Sensitive Practices](#) (October 2019)

MENTAL HEALTH SERVICES & SUPPORTS IN SCHOOLS

MENTAL HEALTH PROMOTION FOR ALL (I.E., TIER 1)

WEBINARS

[Communicating the Value of Social Emotional Learning: Evidence and Resources to Facilitate Community Conversations](#) *(May 2022)*

Social Emotional Learning (SEL) programs are arguably more important now than ever to support student mental health, interpersonal skill development and academic success using a universal public health approach in education. However, many schools and communities question what SEL programs are and face challenges to assess SEL program quality and alignment with local education priorities. This learning session provides practical information about how to communicate what SEL is, including an overview of free, reputable resources that can be used to assess SEL program components and evidence. We offered resources and facilitated discussion related to challenges communicating about SEL to equip participants with skills to lead discussions and answer questions about SEL in their communities.

[Implementing Social Emotional Learning \(SEL\) During a Crisis](#) *(December 2021)*

This session highlights a targeted, feasible approach to implement SEL during a crisis with “SEL Kernels”. SEL Kernels are evidence-based, flexible, practical strategies to promote student SEL skill development, coping and resilience. In this learning session, we will detail the steps of assessing student SEL needs, identifying SEL Kernels to meet those needs, and implementing the SEL Kernels.

[Promoting Mental Health Awareness in Schools](#) *(January 2021)*

Everyone has mental health, which is an essential aspect of our overall health, wellness and success. Moreover, less than half of the youth who need mental health services and supports receive them, due to stigma or not knowing how to get help. This learning session will focus on evidence-based, practical strategies for schools to reduce stigma, increase awareness about the importance of mental health, and promote literacy about what mental health is and how to access supports when needed.

MENTAL HEALTH SERVICES & SUPPORTS IN SCHOOLS

EARLY INTERVENTION & TREATMENT (I.E., TIERS 2 & 3)

WEBINARS

[Afraid of Opening Pandora's Box? How to Address Student Needs After Mental Health Screening in Schools](#) (August 2022)

Schools are increasingly interested and engaged in universal mental health screening for students to inform early detection and intervention to promote student well-being. However, given the increase in child and adolescent mental health needs increasing over recent decades, exacerbated by the COVID-19 pandemic, social media, racial violence and other recent events, schools are understandably concerned about how they will practically and ethically meet the mental health needs of students if they conduct universal screening. This learning session provides practical information about evidence-informed screening practices to help protect school systems from identifying more student mental health need than they can reasonably address. This includes activities schools can engage in prior to screening (e.g., resource mapping, surveillance screening) as well as during the screening process (e.g., gradual scale-up). We also discuss strategies to address student mental health needs that go beyond referral to mental health treatment (i.e., "Tier 3"), with a focus on options available to low-resource settings that experience barriers to care such as mental health professional shortages. Field examples of mental health screening and how student needs were addressed are provided.

[Measurement-Based Care Series](#) (November 2021-March 2022)

Student mental health early intervention (Tier 2) and treatment (Tier 3) services and supports are a vital component of any comprehensive school mental health system, but how student-centered, evidence-based, and effective are they?

[Part I: Introduction to Measurement-based Care for more Personalized, Collaborative, & Effective School Mental Health Interventions](#) (November 2021)

In this session, Dr. Connors provides guidance on how your school or district team can integrate measurement-based care (MBC) in your Tier 2 and 3 services to improve service quality, track outcomes, and sustain these crucial services for students with emerging or existing mental health needs. This session provides information on what MBC is, why it is useful for schools, how to locate free and low-cost progress measures, and best practices in training and implementation support for school professionals.

SCHOOL MENTAL HEALTH FINANCING

REPORTS

[Medicaid & School Mental Health Services: FAQs](#) *(August 2022)*

Medicaid is an important source of financing for school mental health services. In this report, we discuss how schools can finance school mental health services through Medicaid by answering some frequently asked questions. Among our answers, we describe the requirements for seeking Medicaid reimbursement for school mental health services, we discuss additional complexity in the context of Medicaid Managed Care, and we highlight examples of how states have leveraged Medicaid State Plan Amendments and Medicaid Waivers to expand coverage of school mental health services under Medicaid.

INFOGRAPHICS

[The Elementary & Secondary School Emergency Relief \(ESSER\) Funds & School Mental Health in the Southeast](#) *(August 2022)*

This report summarizes federal and state guidance on using the Elementary and Secondary School Emergency Relief (ESSER) funds, approved as part of multiple federal COVID-19 relief bills (2020-2021), to provide school mental health services and supports. Information about state-level guidance is focused on the eight states in the Southeast region (HHS Region 4).

[Leveraging State Plan Amendments & Medicaid Waivers to Expand School Mental Health Services in Medicaid](#) *(August 2022)*

Every state's Medicaid program has different requirements for reimbursing school mental health (SMH) services. In many cases, expanding coverage of SMH services in Medicaid requires seeking approval from the federal government for a State Plan Amendment (SPA) and/or a Medicaid waiver to make changes to these requirements. In this short report, we introduce SPAs and Medicaid waivers, and we give examples of how states have leveraged SPAs and Medicaid waivers to expand coverage of SMH services in their Medicaid programs.

[What School Mental Health Services Does Medicaid Cover?](#) *(May 2022)*

Medicaid can cover many school mental health services. In this infographic, we provide examples of screening services, treatment services, and supportive services for which schools can often seek Medicaid reimbursement.

SCHOOL MENTAL HEALTH FINANCING (CONTINUED)

INFOGRAPHICS CONTINUED

[Financing School-Based Services through Medicaid: Reimbursement for Administrative Expenses](#) *(September 2021)*

Schools can receive Medicaid reimbursement for certain qualifying administrative activities (e.g., outreach and enrollment, supports of Medicaid-eligible direct services). This infographic highlights two broad classes of administrative activities that are often reimbursable under Medicaid.

[What is Cost-Based Reimbursement? Financing School Based Services Through Medicaid](#) *(August 2021)*

Many Medicaid-eligible school-based services are reimbursed under a cost-based system. This infographic provides an introduction to cost-based reimbursement systems.

[Comparing Reimbursement Systems: Fee for Service \(FFS\) vs. Cost-Based – Financing School Based Services Through Medicaid](#) *(August 2021)*

Medicaid reimburses most eligible school-based services through one of two systems: fee-for-service and cost-based reimbursement. This infographic illustrates how the actions of schools and state Medicaid offices between the two reimbursement systems.

[How are Local Education Agencies \(LEAs\) Paid Under Cost-Based Reimbursement? Financing School Based Services through Medicaid](#) *(August 2021)*

Many state Medicaid offices use a cost-based system to reimburse service costs and administrative costs associated with school-based service provision. Under cost-based reimbursement, LEAs and state Medicaid offices take routine actions when a Medicaid-eligible school-based service is provided throughout a quarter (or year). At the end of a quarter (year), additional actions are required to determine settlement payments. This two-page infographic walks through all of the steps these actors take both routinely and at quarter-end (year-end) to provide reimbursement under a cost-based reimbursement system.

[The Early & Periodic Screening, Diagnostic & Treatment \(EPSDT\) Medicaid Benefit](#)

(October 2020)

This infographic describes the Early and Periodic Screening, Diagnostic and Treatment (EPSDT) benefit, a rich benefit mandated to be covered in all Medicaid programs for youth (age < 21). It also highlights key common misconceptions about EPSDT.

[Free Care Rule Medicaid Financing Tips](#) *(June 2020)*

This infographic describes the “Free Care Rule” in Medicaid and discusses how the recently changed federal interpretation of this rule can affect local education agencies’ capacity to leverage Medicaid to finance health services, including school-based mental health services. It also includes links to key resources on the Free Care Rule change in 2014 and active state efforts to act on this change.

[Using IDEA to Fund School-Based Mental Health Services](#) *(June 2020)*

This infographic describes how school-based mental health services are financed under the Individuals with Disabilities Education Act (IDEA). It includes basic information about IDEA and individualized education programs (IEPs), and it offers more specific guidance around IDEA and the funding of school-based mental health services for parents, for local education agencies, and for providers.

[Eligibility & Enrollment in Medicaid in the Southeast](#) *(August 2019)*

This infographic provides information about Medicaid eligibility for children and child enrollment rates in the Medicaid program in the Southeast.

This infographic provides an overview of key constraints on Medicaid reimbursement for school mental health services.

WEBINARS

[Medicaid Policy & School Mental Health](#) *(November-December 2023)*

Medicaid is a leading source of financing for school mental health services and programs. As Medicaid policies change, there may be greater opportunities for mental health providers to bill Medicaid for more services in schools. In this two-part webinar event, Dr. Adam Wilk (SE MHTTC Policy Lead) will describe key policies that govern Medicaid funding for school mental health services, and how they can be changed to increase school mental health funding. He will provide examples of states that have pursued specific reforms, and he will also highlight important resources that can help school mental health leaders to identify what steps may be most appropriate to take in their home state. This series is designed for school mental health leaders who are interested in learning 1) about the fundamentals of Medicaid financing of school mental health services and 2) about options for changing Medicaid policy to better support school mental health systems and services.

[Part I: Medicaid Policy & School Mental Health](#) *(November 2023)*

Part I will focus on policies related to who is eligible for Medicaid coverage and what services Medicaid covers.

[Part II: Medicaid Policy & School Mental Health](#) *(December 2023)*

Part II will focus on policies concerning which providers can bill Medicaid for services and whether Medicaid can be billed for services provided in school settings.

WEBINARS CONTINUED

[Medicaid Policy & School Mental Health Funding](#) (May 2023)

Medicaid is a leading source of financing for school mental health services and programs. Looking forward, LEAs and mental health providers may be able to bill Medicaid for more services if there is better alignment between Medicaid policies and the services provided. In this webinar event, Dr. Adam Wilk (SE MHTTC Policy Lead) will describe key processes through which Medicaid policies can be changed to increase Medicaid funding support for school mental health services. He will provide examples of states that have pursued specific reforms, and he will also highlight important resources that can help school mental health leaders to identify what steps may be most appropriate to take in their home state. This session is designed for those who are interested in learning more about options for changing Medicaid policy to better support school mental health systems and services.

[Financing Opportunities to Boost Mental Health Services in Schools in 2023: The Bipartisan Safer Communities Act](#) (March 2023)

The Biden Administration and Congress are showing renewed commitment to improving school-based mental health and substance use disorders services for young people. Through passage of the Bipartisan Safer Communities Act (2022), we expect to see new federal guidance (revising policies that have not been updated in almost 20 years), the launch of a school Medicaid technical assistance center, and \$50 million in state grants. In this webinar event, Lena O'Rourke (on behalf of Healthy Schools Campaign), Orla Kennedy and Dusan Stojicic (Community Catalyst) explain how school mental health leaders can leverage these opportunities to improve school-based health services, including meaningfully engaging young people in that process.

[Medicaid and School Mental Health: A Guided Tour Through Available Resources](#) (November 2022)

Medicaid is a leading source of financing for school mental health services and programs. In this webinar event, Dr. Adam Wilk (SE MHTTC Policy Lead) will orient attendees to nearly 20 resources – reports, infographics, webinar recordings, and more – that help to explain the role of Medicaid in school mental health financing and how to use it to pay for mental health services in schools.

[School Mental Health Financing & Sustainability: Using Stimulus Funds to Advance Comprehensive School Mental Health](#) (December 2021)

In this webinar, leaders from two school districts in the Southeast will join a panel to describe how they and their partners have made innovative use of Stimulus funds to finance their school mental health initiatives. The panelists discuss how their current approaches built upon prior school mental health programs and existing sources of financing, as well as how they are working towards sustainability. They also share their perspectives on how other school districts—which may be different from theirs in key respects (e.g., size, administrative capacity)—might think about the opportunities to appropriate these new funds in support of students' mental health.

[Financing School Mental Health Services during a State Budget Crisis](#) (July 2020)

Today's economic crisis, driven by the COVID-19 pandemic and social distancing measures, poses significant challenges for state-budget-makers. This webinar, led by health care financing expert Dr. Adam Wilk, discusses those challenges in the context of school and school district leaders' efforts to finance school mental health programs.

[Financing School Mental Health Services](#) (August 2019)

This webinar, presented by Dr. Adam Wilk, aims to clarify how it can be determined whether a given school based mental health service will be reimbursable through Medicaid and by Medicaid Managed Care plans. Dr. Wilk also offers insights as to how school districts and school based mental health program leaders might think about Medicaid as a potentially important source of financing.

[Creating Cultures of Staff Wellness for Our Schools & Community Partners \(2021-2023\)](#) *(September 2023)*

This learning series is designed to help school staff reset and restore their senses of wellness, and to help inform the way districts and schools promote cultures of care that benefit staff and parents.

[Part I: Back to School Wellness for School Staff](#) *(September 2023)*

Feeling the Back to School blues? Stressed being on campus again? Interested in hacks that help make it better? This session is designed for all of you showing up to navigate the new year with students and colleagues. You have a lot to do. This is an opportunity to make sure YOU are on your own to-do list. Take care of you right now and this year using efficient tools and strategies. Building on self-care and collective care modules from earlier in this series, our session distills practices that anyone can use to boost resilience, buffer stress, and sustain wellness. This session identifies free resources that help ease the transition into the school year right now and support your well-being all year long.

[Part II: Schoolwide Wellness: Staff, Parents, & Families](#) *(September 2023)*

Are you feeling supported at work? Is there synergy amongst your staff? Is your school on the same page with your community partners and parents? With the importance of focusing on our students' success, it's easy to put off attending to ourselves and our colleagues. In this session, we review practical recommendations and resources that put a campus culture of resilience within reach. Creating a climate of respect and compassion and sustaining a culture that values adults as allies in the shared mission of the school does not have to be an after-thought. Together, we will identify practices that are practical, accessible, and impactful for your school community's well-being.

DATA AND MEASUREMENT

WEBINARS

[NOMs Data Collection for Project AWARE Grantees](#) (May 2022)

SAMHSA established the National Outcome Measures (NOMs) to provide uniform measurement of behavioral health outcomes across grant funded programs and initiatives. The purpose of this two-part training series is to provide guidance, tools, and practical resources to AWARE grantees to help them successfully navigate the NOMS data collection and reporting process. The series consists of two sessions that combine direct instruction with workshopping to explore how learnings can be applied to local grantee service settings.

[Part I: An Overview](#) (May 2022)

This 90-minute session introduces the National Outcome Measures (NOMs) data collection and reporting process and discussed how it can be implemented within a school-based or school-linked mental health services setting. The session provides an overview of the NOMs Client-level Measurement Tool and domains, reviewed key stakeholder roles and responsibilities, and detailed data collection and management practices. The session was designed for AWARE SEA and LEA team members who have a role in collecting or reporting NOMS data.

[Part II: SPARS Data Reporting, Monitoring, & Data Use](#) (May 2022)

The second 90-minute session builds on information presented in the Part 1 of this series. This session provides an overview of SAMHSA's SPARS data reporting system, including guidance on how to access SPARS and how and when to enter National Outcome Measures (NOMs) data, how to use SPARS monitoring tools and reporting functions, and how to export and analyze data to support local project implementation. The session is designed for AWARE SEA and LEA team members who have a role in collecting or reporting NOMS data.

LGBTQ+ STUDENT MENTAL HEALTH

TOOLKITS

[LGBTQ+ Youth Mental Health Toolkit](#) (April 2022)

The Southeast MHTTC School Mental Health Initiative collaborated with the Center of Excellence on LGBTQ+ Behavioral Health Equity to support school mental health providers as they increase their skills as affirming providers to better support LGBTQ+ students.

WEBINARS

[LGBTQ+ Youth Mental Health Webinar Series](#) (May 2022)

In Spring 2022 we hosted three live learning sessions focused on building provider skills for supporting LGBTQ+ youth. The intended audience for this series is providers who are interested in learning more about how they can best support their LGBTQ+ clients.

[Part I: How to Signal you are an Affirming Provider & How to Respond when a Young Person Discloses their SOGIE](#) (May 2022)

This session, hosted in collaboration with the Center of Excellence on LGBTQ+ Behavioral Health Equity, provides guidance on what types of school policies and strategies can be implemented to help promote and build an affirming environment for LGBTQ+ young people. Attendees also learn strategies for responding when a student discloses their sexual orientation and/or gender identity and expression (SOGIE).

[Part II: Supporting Families of LGBTQ+ students](#) (May 2022)

In this session, hosted in collaboration with the Center of Excellence on LGBTQ+ Behavioral Health Equity, we provide helpful tips on working with families and other caregivers of LGBTQ+ youth. Some families may struggle to understand their child or youth's sexual orientation or gender identity. Some may fear rejection from their own communities or fear what the future may hold for their family. During this session, attendees hear about the importance of family support, strategies for helping families process their feelings, and promising programs that are making strides towards creating evidence-based programs for families of LGBTQ+ youth.

SUPPORTING NEURODIVERSE STUDENTS IN THE CLASSROOM

NOTE ON LANGUAGE USE

Starting in Spring 2022, we made a shift from using person-first language (e.g., students with autism) to identity first language (e.g., autistic students). We made this decision in response to the neurodiversity movement, based on the preference of many autistic adults, and in an attempt to avoid the use of ableist language. However, we recognize that this is not the preference of every individual or family and that many people continue to use person-first language.

TOOLKITS

[Resources to Support the Mental Health of Autistic Students at School](#) (August 2022)

The Southeast MHTTC put together this comprehensive toolkit made up of webinars and resources to support students with intellectual and developmental disabilities.

INFOGRAPHICS

[Strategies to Support Executive Function in Autistic Students: Inhibition](#) (January 2024)

Recent prevalence estimates indicate that 1 in 36 school-age children have autism. Autistic students are much more likely than non-autistic students to experience mental health challenges, including difficulty with aspects of executive function such as inhibition. This infographic provides information about strategies that can be used by educators to help autistic students build their inhibition skills in a manner that is inclusive and neurodiversity affirming.

[Strategies to Support Executive Function in Autistic Students: Planning](#) (July 2023)

Recent prevalence estimates indicate that 1 in 36 school-age children have autism. Autistic students are much more likely than non-autistic students to experience mental health challenges, including difficulty with aspects of executive function such as planning. [Understanding & Supporting the Executive Functioning of Autistic Students](#)

(February-March 2023)

Attention Deficit Hyperactivity Disorder (ADHD) is the most common co-occurring diagnosis for autistic youth. However, the substantial overlap between autism and ADHD can pose challenges in identifying and supporting students with autism, ADHD, or both. The goal of this webinar series is to provide information about executive functioning differences that are common in autistic students and how these challenges relate to and are distinct from ADHD.

[Part I: Understanding executive functioning differences among autistic students with & without co-occurring ADHD](#) *(February 2023)*

Part 1 will help participants to understand common executive functioning differences in autistic students and how these differences relate to ADHD.

[Part II: Evidence-based approaches to support the executive functioning of autistic students](#) *(March 2023)*

Part 2 will provide an overview of evidence-based approaches that can be used to support the executive functioning of autistic students, including those with co-occurring ADHD.

[Supporting the Mental Health of Autistic Students in the Classroom: Your Questions Answered](#) *(September-October 2022)*

1 in 44 school-age children have autism spectrum disorder (ASD). Autistic students are much more likely than non-autistic students to experience mental health challenges, including difficulty with emotion regulation, anxiety, and depression that may be exacerbated by experiences of bullying, victimization, and segregation within schools. There is an urgent need to support the mental and behavioral health of autistic students. In the past year, the SEMHTTC team has disseminated resources related to identifying and supporting mental health challenges in this population, with a specific emphasis on anxiety [here](#). The purpose of this two-part series is to build on the didactic content covered in our earlier learning sessions and provide more opportunity to cover a case example, engage in discussion, and have ample time for Q&A.

[Part II: Supporting the Mental Health of Autistic Students in the Classroom: Your Questions Answered](#) (October 2022)

[Understanding & Supporting the Behavior of Students with Autism Spectrum Disorder](#) (April 2022)

This webinar provides an overview of the reasons that challenging behavior may occur in students with autism spectrum disorder (ASD). It also provides an overview of strategies that can be used to prevent challenging behaviors in these students, and resources that can provide additional information related to managing challenging behaviors. The two presenters have expertise in supporting students with ASD and behavioral health challenges within school settings.

[Supporting the Mental Health of Students with Intellectual & Developmental Disabilities](#) (September 2021)

In this two-part webinar series, Part I defines intellectual and developmental disabilities (IDDs) and describes signs of mental health challenges in students with IDDs. Part II of this series provides an overview of evidence-based approaches and practices that can be used within schools to support the mental health of students with intellectual and developmental disabilities. It also describes challenges and solutions when implementing these practices in schools.
