

# Context Clues: Using Social Determinants of Health (SDOH) to Enhance Treatment

[Learn More](#)

This monthly training series will provide health care providers and other interested parties the tools they need to identify social determinants of health and strategies for addressing them. Attendees will learn how economic stability, education access and quality, health care access and quality, neighborhood and environmental factors, and social and community context affect patients' health and quality-of-life outcomes.

A certificate for one contact hour will be provided upon completion of each session.
