Individual Placement & Support Learning Collaborative

Boosting Application of IPS Supported Employment & Education Best Practice with Young Adults: A Vocational Learning Collaborative

Beginning September 3rd, 2021

This virtual series of six meetings will promote further peer-to-peer learning and collaboration among Region 6 Employment and Education providers in community mental health settings who want to better engage and support the career development of young adults with serious mental health needs. Each learning collaborative will cover a topic that is critical for engagement and career development; an activity; and a discussion facilitated by trainers with lots of real-world vocational and community mental health experience.

During this training, participants will build connections with other vocational support providers, process and collaborate on real world challenges by applying evidence-based IPS Supported Employment and Education, and more.
