

# UnitedHealthcare Behavioral Health Education Series

Series produced in collaboration with UnitedHealthcare

## Next Webinar: Psychological Treatment of ADHD

12-1 p.m. CT Friday, Nov. 19

This presentation will provide an overview of attention deficit hyperactivity disorder (ADHD). Participants will learn about the symptoms of ADHD, DSM-5 diagnostic criteria, prevalence, course, and long-term outcomes of ADHD. Additionally, the importance of comprehensive evaluation for ADHD will be addressed, due to the range of other causes of symptoms of ADHD and the frequency of comorbidities associated with ADHD. Participants will be exposed to components of a comprehensive multi-method, multi-rater evaluation for ADHD. Presenter will also discuss empirically supported interventions for ADHD, including specific behavioral strategies that can be utilized by PCPs.

### Learning Objectives

1. Describe symptoms of and diagnostic criteria for ADHD
2. Describe common alternative explanations for symptoms of ADHD and common comorbidities associated with ADHD, and why comprehensive evaluation is important
3. Discuss comprehensive evaluation for ADHD
4. Discuss empirically supported interventions for ADHD
