Get to know the Zoom Webinar interface

The screenshot shows a Zoom Webinar interface with several key components and annotations:

- Top Bar:** Includes "Zoom Webinar", "You are viewing David Terry's screen", and "View Options".
- Header:** "TTC Technology Transfer Centers" logo and "Funded by Substance Abuse and Mental Health Services Administration".
- Main Content:** "Thank you for joining us today!" and "You will not be on video during today's session".
- Q&A Panel:** A "Question and Answer" window is open, showing a test question: "This is a test question!". It includes tabs for "All questions (1)" and "My questions (1)". A text input field at the bottom says "Type your question here...".
- Chat Panel:** A "Zoom Webinar Chat" window is open on the right, showing a "To: All panelists" field and a message: "Your text can only be seen by panelists".
- Bottom Bar:** Contains "Audio Settings", "Chat", "Raise Hand", "Q&A", and "Leave" buttons.

Annotations:

- "Click here to maximize your session view" points to the "Enter Full Screen" button.
- "You can switch between questions you've asked and those asked by others using these buttons." points to the "All questions (1)" and "My questions (1)" tabs.
- "You can use the Q&A feature to ask questions of the host and presenters. These questions can receive text or live responses. To begin asking a question use the field below. You can see a test question above." points to the "Type your question here..." input field.
- "The chat feature will allow you to talk with other people in today's webinar." points to the chat window.
- "The To field will tell you who will receive your message. Be mindful of who you are chatting to." points to the "To: All panelists" field.
- "Click here to leave the session" points to the "Leave" button.
- "Click Here to adjust your audio settings" points to the "Audio Settings" button.

Housekeeping Items

- We have made every attempt to make today's presentation secure. If we need to end the presentation unexpectedly, we will follow-up using your registration information.
- Have a question for the speakers? Use the Q & A button
- Have a comment or link for all attendees? Use the chat and select to "all attendees"
- At the end of today's webinar, please complete a **brief** survey.
- You will receive an email on how to access a certificate of attendance; must attend at least an hour.

- This event is closed captioned!

- Follow us on social media:

Substance Abuse and Mental Health
Services Administration

Tison Thomas is currently the Director of the Division of State and Community Systems Development within the Center for Mental Health Services at SAMHSA. In this role, he manages staff who oversee and monitor the Mental Health Block Grants, the Protection and Advocacy for Individuals with Mental Illness grants, the Projects for Assistance in Transition from Homelessness (PATH) grant program, the Minority Fellowship Program grants and several contracts and grants. Prior to joining the Division, Mr. Thomas served as SAMHSA's PATH Program Director. He has more than twenty-five years of diverse experience in the healthcare field at the local, state, and federal levels.

He holds a Master's Degree in Social Work and has managed a variety of grant programs, contracts and initiatives. Mr. Thomas came to SAMHSA after serving in a leadership role at the state level where he directed statewide initiatives to implement evidence-based practices and programs in the public mental health and substance abuse system, Mental Health Block Grant, certain Medicaid Programs and initiatives. He has also served as a clinical care manager with the managed care organizations and worked as a clinician in outpatient, inpatient, and crisis settings.

Evidence-Based Tools to Improve Clinical Care of Early Psychosis Clients

Center for Mental Health Services

SAMHSA
Substance Abuse and Mental Health
Services Administration

Mental Health Block Grant's Role

- Mental Health Block Grant (MHBG) – Federal Formula Grant to states and territories
- System Transformation Efforts, including Evidence Based Practices
- Duration of Untreated Psychosis
 - Poor Prognosis
 - “despite the existence of effective treatments, there are often long delays – years and sometimes decades – between the first onset of symptoms and when people receive help.”
- Science to Implementation – Several Years
 - No Specific Funding

MHBG ESMI/FEP Set-Aside

- The set aside funding is dedicated to treat those “with ***early serious mental illness, including those with First Episode of Psychosis***” and not for primary prevention or preventive intervention.
- States can implement models which have demonstrated efficacy, including the range of services and principles identified by NIMH. SAMHSA encouraged states to focus on individuals with a First Episode Psychosis (FEP) and use one of the CSC models.
- States can leverage funds through inclusion of services reimbursed by Medicaid or private insurance
- ***SAMHSA Focus:*** Every state should be able to begin to move their system toward early intervention or enhance the early intervention services already being implemented.

Dates and ESMI/FEP Milestones

Jul. 2009	NIMH clinical trials for FEP commence
Dec. 2013	NIMH implementation study completed
Jan. 2014	P.L. 113-76: \$22.8M set-aside for FEP
Apr. 2014	NIMH/SAMHSA FEP guidance to states
May 2014	SAMHSA technical support to states begins
Dec. 2014	P.L. 113-483: \$22.8M set-aside for FEP
Oct. 2015	NIMH clinical trials for FEP completed
Oct. 2015	CMS coverage of FEP intervention services
Dec. 2015	P.L. 114-113: \$50.5M set-aside for FEP
Dec. 2016	P.L. 114-255: 21 st Century Cures Act
May 2017	P.L. 115-31: \$53.3M set-aside for FEP
Mar. 2018	P.L. 115-141: \$68.5M set aside for FEP
Dec. 2019	P.L. 116-94: \$68.5M set aside for FEP
Mar. 2020	P.L. 115-245: \$68.5M set aside for FEP
Dec. 2020	P.L. 116-260 : \$68.5M set aside for FEP
Dec. 2020	P.L. 116-260 (CRRSA) : \$82.5M set aside for FEP
Mar. 2021	Public Law 117-2 (ARP): 142.5M set aside for FEP
Mar. 2022	P.L 117-103: \$81.3M set aside for FEP
Total	\$661.2M (to-date)

Mental Health Block Grant Plans: <https://bgas.samhsa.gov/>

Early Serious Mental Illness Prevalence and Treatment

- In 2017, the NIMH funded Mental Health Research Network estimated that there are approximately 114,000 new cases of psychosis each year in the US (Simon et al., *Psychiatric Services*, 2017; 68:456–461).
- In 2020, 50 state CSC programs reported service use data. State Mental Health Authorities reported that 18,027 persons with early SMI received CSC services in SAMHSA-supported programs.
- In 2021, states reported 343 FEP programs

Federal Efforts

- State's role in improving public mental health system
- Partnership between SAMHSA and NIMH
 - Including others (ASPE, NASMHPD; working with CMS)
- Technology Transfer Centers (TTCs)
- Improving outcomes

Susan T. Azrin
PhD

National Institute
of Mental Health

Susan T. Azrin is Unit Chief of the Early Psychosis Prediction and Prevention research unit at the National Institute of Mental Health, Division of Services and Intervention Research, where she also leads the Early Psychosis Intervention Network (EPINET) initiative. She served as Government Project Officer for the Recovery After an Initial Schizophrenia Episode-Early Treatment Program (RAISE-ETP) clinical trial, a pioneering study demonstrating the effectiveness of team-based Coordinated Specialty Care for people with early psychosis.

Dr. Azrin also leads the NIMH research program on improving health and reducing premature mortality in people with serious mental illness and serves as the Science Officer for the Mental Health Research Network, a learning mental health system.

Compiled by:
Westat
An Employee-Owned Research Corporation®
1800 Research Boulevard
Rockville, Maryland 20850-3129
(301) 251-1500

The CAB serves as the basis for common individual-level data collection across all EPINET programs

The CAB was designed as a resource that can reasonably be included in data collection efforts within CSC programs

CAB data can be aggregated in a database with statistical power

The CAB was developed through a 12-month consensus process by the EPINET Steering Committee

Images are for illustrative purposes only. Any person depicted in the photo is a model. Photos used under license with Getty Images by Westat.

Core Assessment Battery (CAB)

The EPINET Core Assessment Battery (CAB) includes standardized measures and individual items that assess key domains of early psychosis psychopathology, recovery, contextual factors, and treatment. The CAB was developed through a consensus process by the EPINET Steering Committee, which is composed of principal investigators from each of the regional academic hubs and the EPINET National Data Coordinating Center (NDCC).

Publication date: July 30, 2020

- EPINET CORE ASSESSMENT Battery Baseline (PDF)
- EPINET CORE ASSESSMENT Battery Follow-Up (PDF)
- User Guide: EPINET Core Assessment Battery (PDF)

Domains Covered in the Core Assessment Battery

Domain name	Items or Measures Within Domain
Cognition	Cognition Items (11DP) SAC App (1DP) FERN CNS (1DP)
Demographics and Background	Demographics and Background Items - Baseline (1DP) Demographics and Background Items - Follow-Up (1DP)
Diagnosis	Diagnosis Items (1DP)
Discharge Planning and Disposition	Discharge Planning and Disposition Items (1DP)
Duration of Unreated Psychosis (DUP) and Pathway to Care	DUP and Pathway to Care Items - baseline (1DP) DUP and Pathway to Care Items - follow-up (1DP)

In addition to English, all client self report measures are available in 7 additional languages and available for download on the EPINET website

The screenshot shows the EPINET website interface. At the top, the EPINET logo and tagline "Accelerating advances in early psychosis care, recovery outcomes, and scientific discovery through a national early psychosis learning health care partnership" are visible. The navigation menu includes "ABOUT", "CORE ASSESSMENT BATTERY (CAB)", "RESOURCES", "CONTACT US", and "COMMUNITY PORTAL". The "CORE ASSESSMENT BATTERY (CAB)" dropdown menu is open, showing "Core Assessment Battery (CAB) Translations" with a list of languages: Arabic, Cantonese, Haitian Creole, Simplified Chinese, and Spanish. The "Arabic" option is highlighted. The main content area is titled "Core Assessment Battery Translations" and states: "The CAB client self-report measures are available in the following languages:". Below this, a list of measures is provided:

- Adverse Childhood Experiences (ACES)
- Adherence Estimator
- Child and Adolescent Trauma Screen (CATS) – Youth Report (Age 7-17)
- CollaboRATE
- COVID-19 Supplement baseline

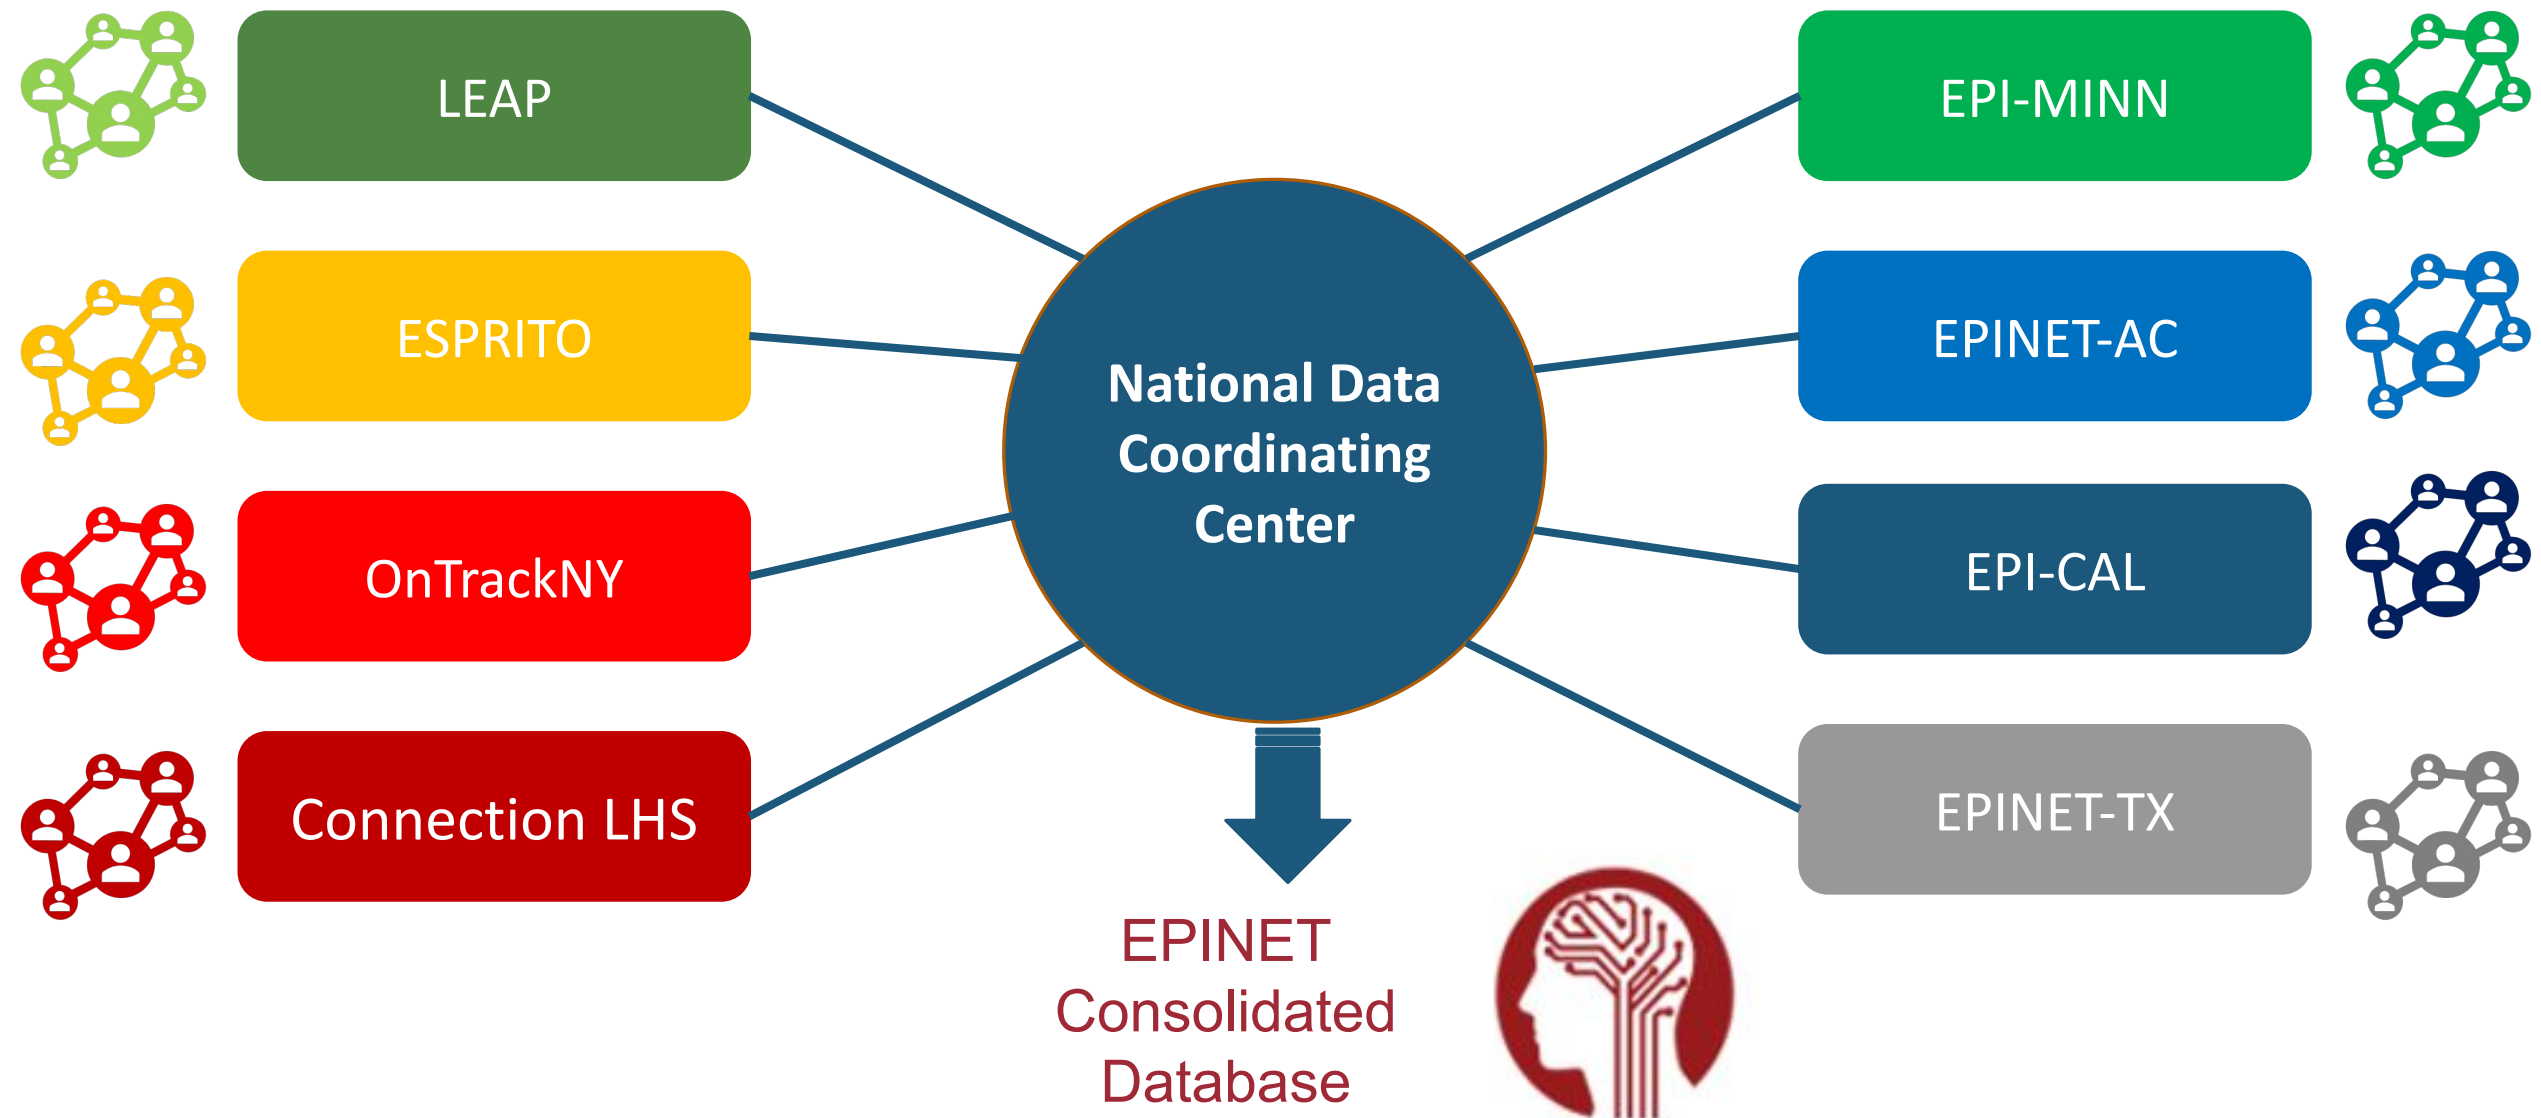

EPINET

WebCAB

Web-Based Core Assessment Battery

CAB: Data Sharing to Maximize and Accelerate Learning

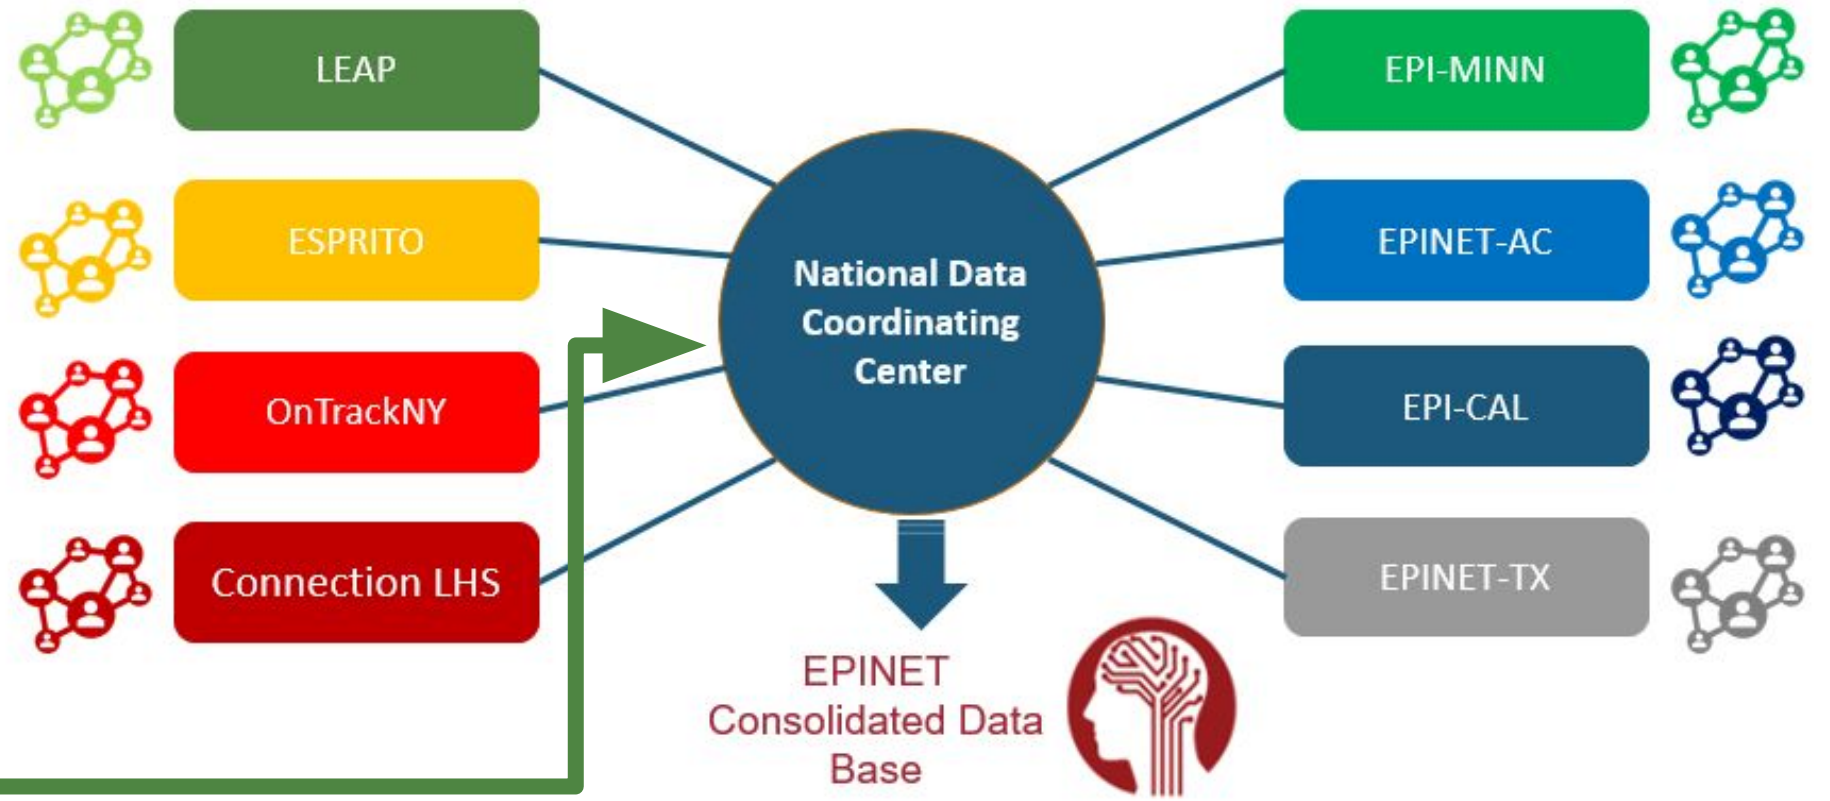

5,000 – 8,000 Participants

EPINET WebCAB

Web-Based Core Assessment Battery

Web-based platform designed to **foster data collection efforts in CSC programs outside of EPINET**. Simple design and user-friendly interface to allow programs to input data, track clients, view change over time, and compare their program's data with data from the EPINET consolidated database. These data will also be part of the consolidated database.

- Programs may include new or existing clients in their database.
- Measures may be administered in several ways but clients cannot enter data directly into the WebCAB system
 - Client completes paper-and-pencil version and then the data are entered into the database by program staff
 - Staff reads the questions to the client and completes the measures using the system
- For data to be included in the EPINET database, the WebCAB system must be used.

**If programs treat clinical high risk patients, then they must have clients complete an additional 3-item scale so that we can tell the CHR clients from the usual FEP clients.

Eligibility:

1. Programs must meet criteria for providing coordinated specialty care
2. Participate in an orientation meeting with the EPINET National Data Coordinating Center to discuss process and eligibility.
3. Complete the program information sheet (PL-CAB)
4. **At a minimum**, programs must agree to:
 - Complete the following measures for each client in the database (** see note above)
 - Demographic and background items
 - Duration of untreated psychosis and pathway to care items
 - At least two additional measures

WebCAB

Immediate Benefits

Using the WebCAB allows CSC programs to:

- Track which assessments have been completed by which clients over time
- Interpret client score and use these data in a meaningful way for clinical intervention or quality improvement.
- View and understand client improvement and change
- Download data immediately for use locally, for research or clinical purposes.
- Be a part of a national database of 100+ programs that are changing our understanding of FEP and how to effectively treat it.

WebCAB

Longer Term Benefits

Using the WebCAB will allow CSC programs to:

- Participate in national trainings on how to use and interpret CAB measures to improve clinical care
- Be among the first to hear about research findings and lessons learned using EPINET data.
- Compare your program's client demographics and outcomes to other programs across the US, or within a region.
- Work with infographic tools to view and compare program data to others programs.

States are Interested in the CAB and WebCAB

12 State Mental Health Authorities, working with CSC clinics funded by MHBG Set Aside, are interested in adopting WebCAB to monitor program and client outcomes

5 State Behavioral Health Directors have reached out to Westat directly for a WebCAB demo

Interested in Using the WebCAB?

Client List Data Entry

Client List

Please create a unique ID for each client.

- Clinics must keep track and store de-identified client IDs in a secure location.
- The same client ID will need to be used for subsequent follow-up assessments.
- The assessment date (YYYY/MM) indicates when the measure was completed, not the date the data were entered into this system.
- Clinics will be responsible for ensuring that client follow-up assessments are completed on the clinic's schedule.

DBR4	Demographics and Background	2020/02	Discharge	Client Summary	Discharge
DBR	Life Events Checklist for DSM-5 (LEC-5) (for ages 18 and older)	2021/12	Active	Client Summary	Discharge

Molly Lopez
PhD

Molly Lopez is the Director of the Texas Institute for Excellence in Mental Health, a licensed clinical psychologist, and a research associate professor at the University of Texas at Austin, Steve Hicks School of Social Work. Her research interests include child and adolescent service systems, implementation of evidence-based practices, and mental health systems development and policy. She has led a number of initiatives focused on enhancing the effectiveness of systems that interact with children, youth, and adults with significant mental health challenges and their families.

Dr. Lopez currently serves as a director of the South Southwest Mental Health Technology Transfer Center (MHTTC) and principal investigator on the Early Psychosis Intervention Network in Texas (EPINET-TX).

April D. Macakanja
MS, LPC-S

April D. Macakanja has been the Practice Manager for the Early Onset First Episode Psychosis Program within The Harris Center for MH and IDD for the last six years, has worked with The Harris Center for over 13 years, and has over 18 years of experience working in mental health. She is a Certified Psychosis Risk Assessor, as well as a Texas Board Certified Supervisor and provides clinical supervision to LPC Interns. She received a Bachelor of Arts in Psychology from the University of Alaska- Anchorage in 2003 and received her Master of Science in Counseling from the University of Houston- Clear Lake in 2008. She thoroughly enjoys the work involved with CSC teams and the focus of First Episode Psychosis treatment, has spoken on numerous panel presentations including those hosted by the Texas Behavioral Health Institute and the Texas Council of Community Centers, and has participated in the planning for the first annual Southwest First Episode Psychosis Conference held in August 2020 virtually. She believes firmly in the work that is done by coordinated specialty care programs and the focus on recovery with first episode psychosis treatment.

Maryam Flory
MA, LPC, LPHA

Maryam Flory is a Licensed Professional Counselor currently serving as the Team Lead for the First Episode Psychosis program at Denton County MHMR. Maryam also operates a small private practice as well as serves as the vice president of the board at The Art Room in Denton, which is a local nonprofit providing art for individuals with mental health issues. Maryam is grateful for the opportunities she has had to work with diverse populations and settings, including experiences with substance use residential treatment, mobile crisis outreach team, and private practice.

Creativity, respect for autonomy and individuality, strengths first, and a holistic approach are central to Maryam's leadership, training, and counseling style. Maryam is passionate about promotion and implementation of preventive and early intervention practices of mental health treatment and accessibility of evidence-based treatment options for all community members.

Samantha Reznik
PhD

Samantha Reznik is the current research postdoctoral fellow with the Advancing the Early Psychosis Intervention Network in Texas (EPINET-TX) project at the Texas Institute for Excellence in Mental Health (TIEMH), University of Texas at Austin. She completed her PhD in Clinical Psychology at the University of Arizona with a focus on psychophysiology and intervention science. She has specialized in providing recovery-oriented services to individuals diagnosed with serious mental illness (SMI) and other underserved populations. She completed a Health Resources and Services Administration (HRSA)-funded clinical internship at University of Kansas Medical Center and an advanced clinical fellowship in rehabilitation and recovery for SMI at VA San Diego Healthcare System/University of California San Diego (VASDHS/UCSD). She also previously worked at the Early Psychosis Intervention Center (EPICenter) in Tucson, AZ for two years.

She is passionate about early intervention for psychosis as well as intervention science, community-academic partnership, and dissemination-implementation research that improves access and quality of mental health services for individuals with SMI and other underserved populations.

Next Steps

The MHTTC Network is funded through SAMHSA to provide this training. As part of receiving this funding we are required to submit data related to the quality of this event.

Please take a moment to complete a **brief** survey about today's training.
