

Fostering a Culture of Mental Health Recovery with Hispanic and Latino/é Communities: A Multisystem Approach

Webinar Description:

This webinar will support the implementation of a recovery-oriented system of care that aligns with Hispanic and Latino/é cultural values. The goal of mental health services is to cultivate an environment in which individuals with lived experiences of mental health concerns feel comfortable seeking care, engaging in treatment, and supported on their journey towards recovery. Understanding the various barriers to recovery-oriented reform (individual, cultural, and structural), developing recovery-oriented competencies, and communicating recovery-oriented messages within Hispanic and Latino/é communities can enhance a recovery-oriented system of care.

Presenters:

Oscar F. Rojas Perez, Darice Orobítg, Katty Rivera, Caribel Sanbria Velez, Graziela Reis, Maria E. Restrepo-Toro, and Kristine Irizarry

Intended Audience:

Mental health practitioners, peer providers, individuals with lived experience, and family members.

Learning Objectives:

1. Understand structural challenges to supporting mental health recovery in Hispanic and Latino/é communities.
2. Recognize recovery-oriented staff competencies to enhance and promote recovery with Hispanic and Latino/é individuals.
3. Identify strategies on how to integrate Hispanic and Latino/é cultural elements and values with principles of recovery.
4. Learn from a peer leader about the impact of peer support mental health services in supporting recovery among Hispanic and Latino/é communities.

**Latiné (pronounced la'ti-ne) is a gender-neutral form of the word Latino, created by LGBTQIA+, gender non-binary, and feminist communities in Spanish speaking countries. The objective of the term Latiné is to remove gender from the Spanish word Latino, by replacing it with the gender-neutral Spanish letter é.*
