

Mid-America (HHS Region 7)

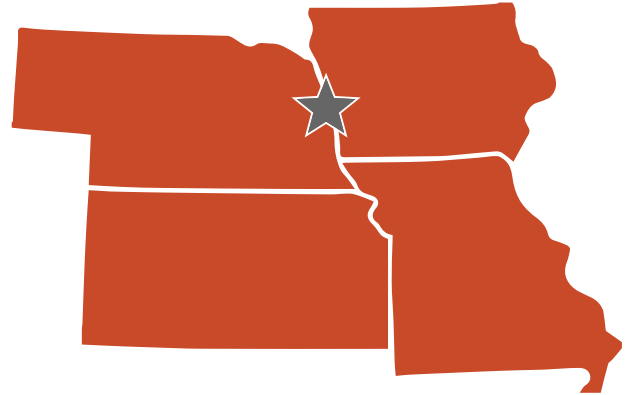

MHTTC

Mental Health Technology Transfer Center Network
Funded by Substance Abuse and Mental Health Services Administration

Year 3 report
August 2020-2021

The Mid-America Mental Health Technology Transfer Center (MHTTC) provides technical training and assistance in integrated care, school mental health, serious mental illness, and behavioral health workforce development across HHS Region 7.

This report provides an overview of our work in our third grant year.

Overview

Year 3 was characterized by new challenges, valuable lessons learned, and resilience. In 2020, health care professionals were in the depths of responding to the COVID-19 pandemic, and as such, many of our training offerings and technical assistance reflected those needs. Year 3 also saw the continuation of the Center's efforts to double down on racial equity considerations across all areas of focus, including providing trainings on cultural responsiveness in integrated care and how to address social determinants of health. We targeted efforts towards provider well-being through the dissemination of newly developed curriculum resources including video modules, workbooks, and webinar trainings. Furthermore, network collaboration allowed us to conduct a national summit on Organizational Wellbeing.

By the Numbers

90.46% — surveyed trainees satisfied or very satisfied with Y3 trainings

159 – new products + resources available online

3,486 – products + resources accessed online

96 – free trainings available to public

16 – national collaborations

Rapid Response to Emergent Needs

Throughout Year 3, we devoted ample time to:

- Building capacity to respond to the COVID-19 pandemic in integrated primary care settings
- Strengthening clinicians' comfort with telehealth and other new technologies; and
- Providing well-being support to front-line health care workers and educators
